CEREALS

BlackHawk[®]

THE ONLY PRE-FORMULATED BURNDOWN SOLUTION WITH TWO ACTIVES AND TWO MODES OF ACTION

WEED CONTROL CHALLENGE

Glyphosate alone used to provide an effective burndown option ahead of corn, cereals or soybeans. But the widespread adoption of herbicide-tolerant crops, and the alarming spread of glyphosate- and Group 2-resistant weeds including Canada fleabane, giant and common ragweed, and others, has dramatically reduced the effectiveness of glyphosate-only control programs.

NUFARM SOLUTION

BlackHawk's[®] all-in-one formulation makes it easier for growers to spray when they need to – up to one day after planting soybeans. BlackHawk, when mixed with Credit[®] Xtreme glyphosate, delivers faster, more complete weed control in a pre-emergent burndown treatment than glyphosate, Group 2 and Group 14 only herbicides. With two active ingredients and two modes of action, BlackHawk doubles as an effective tool for resistance management.

Nufarm

Grow a better tomorrow.

REGISTERED CROPS*

- Soybeans
- Barley
- Wheat (spring, durum, winter)
- Rye
- Oats
- Field corn

WEEDS CONTROLLED

- Burdock (prior to 4 leaf)
- Canada fleabane (suppression) (including glyphosate resistant)
- Cocklebur
- Common dandelion
- Common ragweed
- Daisy fleabane
- Giant ragweed (including glyphosate resistant)
- Lamb's-quarters
- Mallow
- Mustards
- Night-flowering catchfly
- Pigweeds
- Plantain
- Prickly lettuce
- Shepherd's-purse
- Sow-thistle
- Stinkweed
- Wild buckwheat
- Volunteer canola

BENEFITS

- **THREE MODES OF ACTION** when tank mixed with glyphosate
- **FLEXIBILITY** to apply up to one day post-planting in soybeans
- **STRONGER RESISTANCE MANAGEMENT** with two active ingredients that control glyphosate, Group 2- and triazine-resistant biotypes
- **FASTER CONTROL** through systemic and contact activity for broad-spectrum weed control
- **MORE COMPLETE PERFORMANCE** than straight glyphosate or other tank-mix products

PLUS

- Convenient all-in-one formulation
- Tank mixable with most pre-emergent herbicides
- No surfactant required

*See label for individual use patterns.

BLACKHAWK

ACTIVE INGREDIENTS

- > Group 14 (pyraflufen-ethyl)
- > Group 4 (2,4-D)

APPLICATION TIMING

- > Burndown

TREATMENT AREA

- > One case treats 40 acres

TANK-MIX ORDER

- > BlackHawk
- > glyphosate

PRODUCT RATE

- > 1.1 L/ha (445 mL/ac.)

PCP

- > 32111
