NUFARM PROPICONAZOLE

**SAFE, DEPENDABLE, PROVEN CONTROL
OF RUST AND LEAF DISEASE IN CEREALS**

DISEASE CONTROL CHALLENGE

Some rusts are becoming a serious threat to cereal crops in Eastern Canada. Three species are found in cereal fields – stripe rust, leaf rust and stem rust. Leaf rust is the most common and stripe rust has been increasing in incidence in recent years. The earlier in the season a rust infection takes place, the bigger the impact these diseases will have on crop performance.

NUFARM SOLUTION

Nufarm Propiconazole delivers broad-spectrum, curative and preventative activity to control rusts in cereal crops, including stripe rust. A Group 3 fungicide, Propiconazole can be applied early and in combination with herbicides to control rusts and other important diseases. Propiconazole can be safely mixed with all Nufarm cereal herbicides, and leads the industry with tank-mix flexibility and crop safety.

Grow a better tomorrow.

REGISTERED CROPS

- Barley
- Canola
- Corn (including field, seed and sweet)
- Dry bean
- Oats
- Soybean (grown for seed)
- Spring wheat
- Winter wheat

DISEASES CONTROLLED

- Bean rust
- Blackleg
- Cercospora leaf spot
- Crown rust
- Frogeye leaf spot
- Leaf rust
- Net blotch
- Northern corn leaf blight
- Powdery mildew
- Scald
- Septoria leaf/Glume blotch
- Septoria leaf mottle*
- Spot blotch
- Stem rust
- Stripe rust
- Tan spot

BENEFITS

- **MIXES SAFELY** with all Nufarm cereal herbicides
- **BROAD-SPECTRUM** curative and preventative activity
- **LONG-LASTING ACTION** against common foliar diseases
- **INDEPENDENT RESEARCH** indicates rust prevention in cereals increases yields by an average of 34%**

PLUS

- High-performing, low-cost fungicide
- Industry leading tank-mix flexibility and crop safety
- Convenient, all-in-one packaging
- No adjuvant required
- Multiple herbicide and insecticide tank-mix partners are available – consult tank-mix partner label

*suppression only

NUFARM PROPICONAZOLE

ACTIVE INGREDIENT

> Group 3 (propiconazole)

APPLICATION TIMING

> Post-emergent

TREATMENT AREA

> One case treats 160 acres (full rate)

PRODUCT RATE

> 296 mL/ha (120 mL/ac.)

PCP

> 30367
