

Quash®

METCONAZOLE

MAJOR CROPS

- Canola
- Dry bean
- Lentil
- Sunflower
- Chickpea
- Field pea
- Potato

MAJOR DISEASES CONTROLLED

CANOLA

- Sclerotinia stem rot (*Sclerotinia sclerotiorum*)

FIELD PEA

- Powdery mildew (*Erysiphe pisi*)

POTATO

- Early blight (*Alternaria solani*)

SUNFLOWER

- Rust (*Puccinia helianthi*)

DISEASES SUPPRESSED

DRY BEAN

- White mold (*Sclerotinia sclerotiorum*)

CHICKPEA

- Ascochyta blight (*Ascochyta rabiei*)
- White mold (*Sclerotinia sclerotiorum*)

FIELD PEA

- White mold (*Sclerotinia sclerotiorum*)

LENTIL

- Ascochyta blight (*Ascochyta lentis*)
- White mold (*Sclerotinia sclerotiorum*)

POTATO

- White mold (*Sclerotinia sclerotiorum*)

SUNFLOWER

- Sclerotinia head rot (*Sclerotinia sclerotiorum*)

APPLICATION

- **Ground:** 80 L/ac. (20 gal./ac.)
- **Aerial:** 20 L/ac. (5 gal./ac.)

RATES

- Rate flexibility to manage differing levels of sclerotinia risk
- 80 acres per case for light to medium pressure environments or for added protection of sclerotinia trait hybrids
- 60 acres per case for medium to high pressure environments
- 40 acres per case for extreme pressure situations

BENEFITS

- Excellent control of sclerotinia, powdery mildew and early blight
- No adjuvant required to achieve maximum performance
- Simple, light, convenient all-in-one packaging (40-80 acres per case).
- Quash is a systemic fungicide that is absorbed quickly through the cuticle of the plant
- Quash provides excellent residual activity and moves outward in leaf tissue from the initial point of contact with the plant

MIXING ORDER

- 1) Fill tank 1/2 to 2/3 full of water.
- 2) Begin agitation.
- 3) Slowly add Quash and continue to agitate.
- 4) Fill remainder of tank with water.
