

KoAct[®]

**EXCELLENT BURNDOWN CONTROL
OF PERENNIAL DANDELIONS AND
GLYPHOSATE-TOLERANT VOLUNTEERS**

WEED CONTROL CHALLENGE

Perennial dandelions have become a persistent problem in cereals. They are especially tough to control at burndown and compete with your cereal crop for valuable nutrients.

NUFARM SOLUTION

KoAct[®] is an innovative new tank-mix option that effectively controls dandelions at their most vulnerable stage, at spring or fall burndown. KoAct also provides enhanced control of volunteer canola, including glyphosate-tolerant biotypes, even at advanced staging.

CLEAN UP WITH KOACT

Tank mix KoAct with glyphosate for better burndown results.

- Delivers **excellent control** of perennial dandelions
- Offers **strong solution** for narrow-leaved hawk's-beard, shepherd's-purse and more
- Provides **effective control** of kochia

REGISTERED CROPS

- Barley
- Spring wheat (including durum)

MAJOR WEEDS CONTROLLED

KOACT (ALONE)

- Dandelion
- Flixweed
- Hemp-nettle
- Kochia (including glyphosate- and Group 2-resistant)
- Mustards
- Narrow-leaved hawk's-beard
- Shepherd's-purse
- Stinkweed
- Volunteer canola (including glyphosate tolerant)

KOACT + GLYPHOSATE TANK MIX

for enhanced control of these additional weeds

- Lady's-thumb
- Perennial dandelion
- Russian thistle
- Wild buckwheat

BENEFITS OF KOACT

- Registered for use as spring or fall burndown
- Tank mix with glyphosate for broad-spectrum weed control
- Wider weed staging than glyphosate alone
- Two modes of action (Group 2 and Group 4) for stronger resistance management
- Treat 80 acres with just one case

KOACT

- > Active ingredients: Group 2 (tribenuron) + Group 4 (2,4-D ester)
- > Rainfast in four hours
- > No surfactant required
- > Low rate of 5 gal./ac. water delivers optimum control
- > Tank-mix order: tribenuron, glyphosate, 2,4-D ester
