

GoldWing™ Herbicide

PYRAFLUFEN-ETHYL/MCPA (ESTER)

MAJOR CROPS

PRIOR TO SEEDING OR PRIOR TO EMERGENCE

- Field pea
- Barley
- Canary seed
- Corn (field, sweet, pop)
- Oats
- Rye
- Triticale
- Wheat (spring, durum, winter)

Label expansion for certain pulse and industrial oilseed crops planned after 2016 season

MAJOR WEEDS CONTROLLED

133 mL/ac. rate (330 mL/ha)

GOLDWING ALONE CONTROLS

- Annual sow thistle (suppression)
- Cleavers
- Dandelion (suppression)
- Kochia (including Group 2 & glyphosate resistant biotypes)
- Lamb's-quarters
- Mallow
- Mustards (except dog and tansy)
- Narrow-leaved hawk's-beard
- Night-flowering catchfly
- Redroot pigweed (including Group 2 & 5 resistant biotypes)
- Stinkweed
- Volunteer canola (all herbicide-tolerant biotypes)

TANK MIX WITH GLYPHOSATE FOR ENHANCED CONTROL OF EMERGED WEEDS, INCLUDING:

- Canada fleabane (all resistant biotypes)
- Canada thistle
- Cow cockle
- Flixweed
- Round-leaved mallow
- Shepherd's-purse
- Smartweed
- Wild buckwheat

TANK MIXES

- Glyphosate

MIXING ORDER

- 1) Fill tank ½ full of water.
- 2) Add GoldWing Herbicide.
- 3) Add glyphosate.
- 4) Fill remainder of tank with water.

BENEFITS

- Brand new Group 14 active for Canada
- The first pre-seed burndown product with multiple modes of action that can be used prior to seeding field peas
- Provides enhanced herbicide resistance management options for pre-seed weed control
- Increased control of cleavers and protection against the development of glyphosate-resistant biotypes
- Faster activity than Group 2 herbicides
- Unsurpassed crop safety
- Faster, more effective control of glyphosate-tolerant canola
- Two actives and two unique modes of action:
 - Group 14 and 4 active ingredients ensure control of tough to kill weeds
 - Enhanced resistant management with three modes of action in one tank when tank mixed with glyphosate
- Controls Group 2-resistant weeds (i.e. kochia, cleavers, redroot pigweed)
- Controls Group 9-resistant broadleaf weeds (i.e. kochia, volunteer canola)
- Convenience: 160 acres per case or 640 acres per drum and no surfactant required when tank mixed with glyphosate
- Excellent coverage required, recommended application volume of 10 gallons per acre water
