

Arena[®] 50 WDG

INSECTICIDE

LONGEST-LASTING PREVENTIVE CONTROL— EARLY INSTAR GRUBS.

Arena[®] 50 WDG Insecticide provides the longest residual control of white grubs and maximum application flexibility when applied anytime from May 1st to July 15th at 5g/100m² (see below). Arena doesn't need to be immediately watered-in, saving you time and labor. Plus, Arena consistently outperforms Merit[®] Insecticide, especially in early-season applications.

ARENA DELIVERS CONTROL YOU CAN COUNT ON

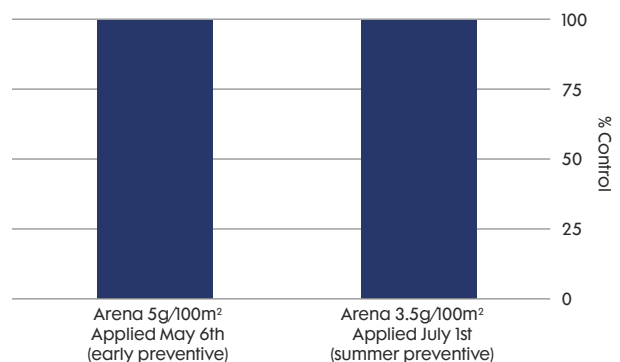

- Superior and consistent white grub control, including European and Northern masked chafer
- Longest residual grub control
- Preventive and curative grub control
- Broad-spectrum control of other tough soil- and surface-feeding insects such as annual bluegrass weevil, crane fly (leather jacket) larvae, billbugs and chinch bugs

APPLICATION INFORMATION

| INSECTS CONTROLLED | APPLICATION RATE | APPLICATION TIMING |
|--|--------------------------|-------------------------------|
| WHITE GRUBS: European Chafer Japanese Beetle Masked Chafers Oriental Beetle | 5g/100m ² | May to June 1st |
| | 3.5-5g/100m ² | June 1st to July 15th |
| | 5g/100m ² | After July 15th (curative) |

SUPERIOR PREVENTIVE GRUB CONTROL

Arena offers rate and timing flexibility to fit both your budget and work schedule, without giving up excellent preventive white grub control.

Arena® 50 WDG

INSECTICIDE

SUPERIOR CURATIVE GRUB CONTROL.

Arena® 50 WDG Insecticide delivers superior curative control of white grubs when applied August or September prior to third instar. And it doesn't need to be immediately watered-in, saving you time and labor. Arena curatively takes care of grubs before skunks and raccoons take care of your turf.

ARENA DELIVERS CONTROL YOU CAN COUNT ON

- Superior and consistent white grub control, including European and Northern masked chafer
- Curative and preventive control of white grubs
- Longest residual grub control regardless of application timing
- Broad-spectrum control of other soil- and surface-feeding insects like chinch bugs

CURATIVE APPLICATION INFORMATION

| INSECTS CONTROLLED | APPLICATION RATE | WATER RATE | APPLICATION TIMING |
|--|----------------------|------------------------|--|
| WHITE GRUBS: European Chafer Japanese Beetle Masked Chafers Oriental Beetle | 5g/100m ² | 4-8L/100m ² | CURATIVE GRUB CONTROL: Apply when evidence of grub activity is noted – August to October. Best control and turf protection achieved if applied prior to third instar. |
| HAIRY CHINCH BUGS | 5g/100m ² | 4-8L/100m ² | |
