

# CREDIT® XTREME

## CREDIT® XTREME IS A UNIQUE HIGH-LOAD, MIXED-SALT FORMULATION OF GLYPHOSATE FOR FAST AND POWERFUL TURF AND WEED BURNDOWN.

### CHALLENGE

As a turf manager or lawn care operator, turf quality is a direct reflection on your image, so when it comes time to renovate it has to be done efficiently. You need a product that works completely and quickly to minimize costs and decrease time for unsightly renovations. A powerful and fast-acting non-selective herbicide that delivers speed and knockdown of turf and tough weeds is essential.

### NUFARM SOLUTION

With both potassium and IPA salts, Credit® Xtreme is the only glyphosate product to offer Dual Salt Technology™. The rapid uptake leads to quicker activity and rainfastness, so you can put your turf renovation on the fast track. Credit Xtreme has an acid equivalent content of 540 g/l glyphosate and treats 50% more acres than many products which only have 360 g/l a.e.

### REGISTERED USES

Turfgrass renovation

APPLICATION RATE	APPLICATION NOTES
1.67–8 L in 100–300 L water/ha	<ul style="list-style-type: none"> <li>• Use higher end of the rate range for perennials.</li> <li>• Do not disturb soil or underground plant parts before treatment.</li> <li>• Where existing vegetation is growing under mowed turfgrass, apply this product after omitting at least one regular mowing.</li> <li>• Tillage or renovation techniques such as vertical mowing, coring or slicing should be delayed for 7 days after application.</li> <li>• For maximum control, delay establishment to determine if regrowth from escaped underground plant parts occurs. When repeat treatments are necessary, sufficient regrowth must be attained prior to application.</li> <li>• Desirable turfgrasses may be established following the above procedures.</li> </ul>

PCP NO.	29888	WSSA GROUP	9
ACTIVE INGR.	glyphosate: isopropylamine salt (30.94%), potassium salt (22.99%) (equivalent to 540 g/l, or 4.5 lbs/gal of the acid glyphosate)		
FORMULATION	water soluble liquid		
CHEM. FAMILY	glycine		
PACKAGE SIZE	2 x 10 L case, 500 L tote, bulk one case treats 30 acres		
SURFACTANT NEEDED	no		

### BENEFITS

- Contains proprietary Dual Salt Technology™
- Takes on the toughest weeds with quick burndown and complete control
- Excellent tank-mix compatibility, even in hard water environments
- Fast translocation activity and rainfastness
- Treats more acres per case or tote than many alternative glyphosate products

### PERFORMANCE TIPS

- Apply to small actively growing weeds
- Apply in clean water
- Do not apply in hard water (use a softener such as AMS)
- Applications to weeds under stress may not provide acceptable control
- In high pH situations (over 6) an acidifying agent is recommended
