

Curtail M

A proven in-crop herbicide with control of Canada thistle in cereals, flax and canary seed.

Registered crops

- Barley
- Canary seed
- Flax
- Oats
- Spring wheat (including durum)
- Timothy

Weeds controlled

- Buckwheat (wild, tartary)
- Canada thistle
- Dandelion (top growth)
- Lamb's-quarters
- Redroot pigweed
- Scentless chamomile
- Shepherd's-purse
- Sow thistle (annual, perennial)
- Stinkweed
- Volunteer canola
- Volunteer sunflower
- Wild mustard

Benefits

- **GETS TO THE ROOT OF THE PROBLEM** with effective systemic activity of two active ingredients that get down to the roots
- **COMPATIBLE** with most graminicides to provide excellent weed control including tank-mixes with Signal®, Axial® Xtreme, Simplicity™ and many others
- **BROAD-SPECTRUM** activity on many hard-to-control broadleaf weeds including pigweed and volunteer canola
- **BEST OPTION** for flax crops with hard-to-kill weeds
- The best above and below ground systemic thistle control
- Makes harvest easier
- Delivers in-crop yield protection

Tank-mix partners

WHEAT AND BARLEY

- Axial and Axial Xtreme
- Broadband**
- Cordon/Puma
- Epic
- Nufarm Tralkoxydim

WHEAT ONLY

- Altitude FX2 (Clearfield® wheat)
- Signal
- Everest*
- Simplicity†
- Traxos
- Varro**

FLAX

- Poast
- Select/Centurion
- Statue

ACTIVE INGREDIENT

- > Group 4 (clopyralid + MCPA ester)

RAINFAST

- > 4 hours

TREATMENT AREA

- > One case treats 20-27 acres

APPLICATION

- > Low rate of 0.6 L/ac. controls small weeds and lighter infestations
- > High rate of 0.8 L/ac. controls larger weeds and heavier infestations

CROP STAGING

- > Wheat: 3-leaf – just before flag leaf
- > Flax: 5 cm – 15 cm in height

*not including durum
†600 mL/ac. rate of Curtail M
