

# Proliant®

Deliver better yields, bigger roots and enhanced early season growth to cereals, corn and forage grasses.

## Registered crops

- Corn (grain, silage)
- Forage grasses

## Proliant delivers

- More yield, bigger roots
- Increased kernel rows in corn and better tip fill
- Increased silage tonnage

## Benefits

- Supplements the plant's natural GA3 production during slow growth stages
- Temporarily increases plant growth rate
- Increases early season photoradiation capture of the treated crop – more photosynthetic capacity

## Usage information

- For best results, the water pH should be around neutral, and always below 8.5
- In many cases, performance is increased if application is made under slow drying conditions and/or addition of a non-ionic surfactant at 0.125% v/v
- Can be applied with most herbicides, fungicides and foliar nutrients (Check with your Nufarm representative for compatibility questions)

### ACTIVE INGREDIENT

- > gibberellic acid, GA3

### RAINFAST

- > Delay application if rainfall is imminent

### TREATMENT AREA

- > Various rates, consult the product label

### CROP STAGING

- > Corn: V3-V6

### NOTES

- > Non-ionic surfactant recommended
