

Effective, economical weed control for turf, including golf courses and sod farms.

# Trillion® OS

## CHALLENGE

Sod farms, golf courses and other turf growers struggle to find the right solution to tackle tough weed problems. Too many brands and products fall short of providing a winning combination of effective weed control at a great price.

## NUFARM SOLUTION

Trillion® OS turf herbicide delivers the hard-hitting answer to tough turf weeds including dandelion, chickweed, plantain and creeping Charlie. The familiar Group 4 formulation provides the performance and price you need in easy-to-handle jugs or special order totes.

## REGISTERED USES

Turfgrass including golf courses, sod farms, and municipal, industrial and residential turf

WEEDS CONTROLLED	APPLICATION RATES & NOTES
Bedstraw Black medic (yellow clover) Buttercup Chickweed Clover Daisy species (English and ground) Dandelion Devil's paint brush Ground ivy (creeping Charlie) Heal-all Ironweed Knotweed Plantain Poison ivy Ragweed Shepherd's-purse	<p><b>TURF (OTHER THAN BENTGRASS):</b>                      On established turf, apply at the rate of 60 mL per 100 m<sup>2</sup> in 10 L of water.                      For larger areas apply at the rate of 5.5 L per hectare in 300 L of water.</p> <p><b>FOR BENTGRASS:</b>                      Apply at a half rate – 30 mL per 100 m<sup>2</sup> in May or late August and September. Use 20 L of water per 100 m<sup>2</sup>.                      Slight yellowing will occur but will disappear after about 1 week.                      Do not overdose bentgrass as damage or kill may occur. Make sure correct rate is applied to the whole area treated.                      When spraying bentgrass use a 1 nozzle sprayer. Make sure spray application does not overlap or excess material will be applied to overlapped areas and damage is more likely to occur.</p>

## PERFORMANCE TIPS

- For best results apply when weeds are growing quickly
- If weed populations do not warrant a broadcast application, consider spot treatments that target only weedy areas
- Grass seed can be safely sown 1–2 weeks after application at recommended rate
- Do not water turf within 24 hours of application
- Do not apply to newly seeded lawns until after third mowing
- Do not freeze

## ACTIVE INGREDIENT

- 2,4-D (190 g a.e./L), mecoprop-p (100 g a.e./L), dicamba (18 g a.e./L)

## FORMULATION

- liquid

## CHEMICAL FAMILY

- phenoxy-carboxylic acid

## PACKAGE SIZE

- 2 x 4 L jug, 2 x 10 L jug, 115 L drum, 1000 L tote
- One 10 L jug treats 4.5 acres (at 5.5 L/ha)

## RAINFAST

- do not spray if rain is forecast

## APPLICATION / SEASON

- up to 2 broadcast applications

## SURFACTANT NEEDED

- no

## PCP #

- 35733

## WSSA GROUP #

- 4

## BENEFITS

- New formulation with built in odor suppressant to provide improved application experience
- Consistent broad-spectrum control of tough annual and perennial turf weeds
- 3-way active ingredient formulation provides strong take-down of the toughest weeds
- Re-entry permitted once spray has thoroughly dried
- Weed control formulated specifically for turfgrass
- Excellent systemic control of emerged weeds
- Non-residual control leaves options open
- Convenient packaging options

## TIMING

- May and early June, and late August and September
- Apply when weeds are actively growing and not under stress
