# CONTACT<sup>TM</sup> XCEL

Active Ingredient: 980g/L linear alcohol ethoxylate

*A non-ionic surfactant which will improve  
the wetting, spreading and sticking  
of agricultural and horticultural sprays*

9 414614 426339 >

**Net: 20 Litres**

L52190211

# Contact™ Xcel

**HAZARD CLASSIFICATION:** 6.1D, 9.3C

This product must not be used for any purpose, or in any manner, contrary to this label unless authorised under appropriate legislation.

**HARMFUL:**

- May be harmful if swallowed, inhaled or absorbed through the skin.

**ECOTOXIC:**

- Harmful to terrestrial vertebrates.

**HANDLING PRECAUTIONS:**

**STORAGE:** Store in original container tightly closed and in a dry cool area away from foodstuffs. Stores containing 1000 litres require secondary containment, more than 1000 litres require emergency response plans and 10,000 litres require signage.

**PERSONAL PROTECTION:** Avoid contact with skin and eyes and inhalation of spray mist. When using wear protective clothing such as impervious gloves, overalls and boots. Remove protective clothing and wash hands and face thoroughly before meals and after work.

**EQUIPMENT:** Apply using well maintained and calibrated equipment.

**DISPOSAL:** Triple rinse empty container and add rinsate to the spray tank. Recycle empty container. Otherwise crush and bury in a suitable landfill. Dispose of product only by using according to the label.

**First Aid:** If swallowed do NOT induce vomiting. For advice contact the National Poisons Centre 0800 POISON (0800 764 766) or a doctor immediately. Have product container or label at hand. If skin or eye contact occurs remove contaminated clothing and flush skin and eyes with running water. Call a doctor.

**Spillage:** Wear appropriate protective clothing and prevent material from entering waterways. Absorb spill with inert material. Dispose of waste safely.

**Transport:** Do not carry more than 10L of Contact Xcel on a passenger service vehicle.

**MIXING:** To minimise foaming in the spray tank always add Contact Xcel when the tank is three quarters full, then keep the filling hose close to the water surface whilst topping up with the remaining water. To ensure complete mixing, circulate thoroughly before commencing spraying.

**GENERAL PROPERTIES:** Contact Xcel is especially formulated for use as an additive to agricultural and horticultural sprays. It reduces the surface tension of spray droplets, causing them to spread out evenly over sprayed surfaces upon impact. This provides an increase in the number of droplets retained by the target which then merge to form a continuous film, allowing maximum sites for chemical action or uptake. The spray will better penetrate waxy water repellent cuticles of insects, fungous lesions, disease infection sites and enhance coverage of, and adherence to, waxy and hairy leaf surfaces. The use of Contact Xcel is of particular value when spraying under hardened growth conditions such as during very dry weather or where vegetation is dust covered.

**GENERAL RECOMMENDATIONS:** Use as an additive to agricultural and horticultural sprays. Refer to agrichemical product labels for specific recommendations on wetters and surfactants. Users should observe the spray pattern closely during spraying and after it has dried. If the pattern is blotchy and uneven, more Contact Xcel is needed. If the spray is running to lower leaf margins or collecting in drip spots on fruit, the amount should be reduced. Do not increase rates when concentrate spraying.

**WARNING:** DO NOT USE CONTACT XCEL ON FRUIT CROPS, OR ON ANY ORNAMENTAL CROP INCLUDING THOSE GROWN FOR CUT FLOWERS, FOLIAGE AND NURSERY PLANTS. Use an alternative adjuvant on these crops that has a proven history of crop safety.

**For use with fungicides, insecticides and plant growth regulators:**

Use 25ml per 100 litres of water unless otherwise specified on the product label. On hard-to-wet crops such as brassicas or onions the rate should be increased to 50 -70ml per 100 litres of water.

**For use with herbicides:** Use 25ml per 100 litres of water unless otherwise specified on the product label. Do not mix with selective herbicides unless a non-ionic surfactant is recommended.

**CONDITIONS OF SALE:****CAUTION: READ THIS NOTICE BEFORE OPENING THE CONTAINER**

**If you open this container you will be deemed to have accepted the conditions below.**

The results from use of this product may be affected by factors beyond Nufarm's control, including mixing, use, climatic conditions, time of application, crop or crop stage and the possible development of resistance to the active ingredient, even though the product is reasonably fit for the purposes stated in this label, and even though label directions are followed. Nufarm will replace, free of charge, any product which is found to have a manufacturing defect. To the extent permitted by law, all other warranties, guarantees, representations and conditions, whether expressed or implied by law, trade, custom or otherwise are expressly excluded.

When you use this product, you agree that neither Nufarm Limited nor any manufacturer of any component of the product will be liable for any damage, injury or loss including consequential loss which arises in any way from the storage, handling, or use of the product. This exclusion of liability includes loss caused by negligent acts or omissions of Nufarm Limited or any supplier or manufacturer of the product or any of their employees and agents.
