KEEP OUT OF REACH OF CHILDREN

READ SAFETY DIRECTIONS BEFORE OPENING OR USING

**T-Rex<sup>®</sup> Selective Herbicide****ACTIVE CONSTITUENTS:** 250 g/L MCPA present as the ethyl hexyl ester

25 g/L DIFLUFENICAN

**SOLVENT:** 362 g/L N-METHYL-2-PYRROLIDONE

GROUP	<b>F I</b>	HERBICIDE
-------	------------	-----------

For the control of certain broadleaf weeds in winter cereals and clover as specified in Directions for Use Table.

**IMPORTANT: READ THE ATTACHED BOOKLET BEFORE USING THIS PRODUCT**

Nufarm Australia Limited  
ACN 004 377 780  
103-105 Pipe Road, Laverton North Victoria 3026  
Tel: (03) 9282 1000  
nufarm.com.au

APVMA Approval No.: 68008/113682

Contents: 5L, 10L, 20L, 110L, 1000L

**STORAGE AND DISPOSAL (5L, 10L, 20L)**

Store in the closed, original container in a cool, well-ventilated area. DO NOT store for prolonged periods in direct sunlight. Triple or preferably pressure rinse containers before disposal. Add rinsings to spray tank. DO NOT dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point. If not recycling, break, crush or puncture and bury empty containers in a local authority landfill. If no landfill is available, bury the containers below 500mm in a disposal pit specifically marked and setup for this purpose clear of waterways, desirable vegetation and tree roots. Empty containers and products should not be burnt.

**Envirodrum 110L Mini Bulk Returnable Container (110 only)**

DO NOT tamper with the Micro Matic valve or the security seal. DO NOT contaminate the Envirodrum with water or any other foreign matter. After each use of the product, please ensure that the Micro Matic coupler, delivery system and hoses are disconnected, triple rinsed with clean water and drained accordingly. When the contents of the Envirodrum have been used, please return the empty Envirodrum to the point of purchase. The Envirodrum remains the property of Nufarm Australia Limited.

**Refillable containers (1000L)**

Store in the closed, original container in a dry, cool, well-ventilated area. DO NOT store for prolonged periods in direct sunlight. Empty contents fully into application equipment. Close all valves and return to point of supply for refill or storage.

**SAFETY DIRECTIONS**

Harmful if swallowed. Will damage eyes. Will irritate the skin. Avoid contact with eyes and skin. DO NOT inhale vapour. When opening the container, preparing spray and using the prepared spray, wear cotton overalls buttoned to the neck and wrist, washable hat, elbow length PVC gloves and goggles. If product in eyes, wash it out immediately with water. After use and before eating, drinking or smoking, wash hands, arms and face thoroughly with soap and water. After each day's use wash gloves, goggles and contaminated clothing.

**FIRST AID**

If poisoning occurs, contact a doctor or Poisons Information Centre (Phone Australia 13 11 26). If swallowed, DO NOT induce vomiting. Give a glass of water. If in eyes wash out immediately with water.

**ADDITIONAL STATEMENTS (WHS REGULATIONS 2011)**

**May damage fertility or the unborn child. May cause respiratory irritation. Harmful in contact with skin and if inhaled.** Do not eat, drink or smoke when using this product. Wear eye and face protection. Avoid breathing spray. Use only outdoors or in a well ventilated area. **IF IN EYES:** Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice / attention. **IF ON SKIN:** Wash with plenty of soap and water. If skin irritation occurs: Get medical advice / attention. **IF SWALLOWED:** Rinse mouth

**SAFETY DATA SHEET**

For further information refer to the Safety Data Sheet (SDS), which can be obtained from your supplier or from the Nufarm website – nufarm.com.au

**In case of emergency: Phone 1800 033 498** Ask for shift supervisor. Toll free 24 hours.

**CONDITIONS OF SALE**

\*Any provisions or rights under the Competition and Consumer Act 2010 or relevant state legislation which cannot be excluded by those statutes or by law are not intended to be excluded by these conditions of sale. Subject to the foregoing, all warranties, conditions, rights and remedies, expressed or implied under common law, statute or otherwise, in relation to the sale, supply, use or application of this

product, are excluded. Nufarm Australia Limited and/or its affiliates ("Nufarm") shall not accept any liability whatsoever (including consequential loss), or howsoever arising (including negligence) for any damage, injury or death connected with the sale, supply, use or application of this product except for liability which cannot be excluded by statute."

## DIRECTIONS FOR USE

## RESTRAINTS

DO NOT apply to crops or weeds which are stressed due to dry or excessively moist conditions.

DO NOT apply to crops under stress due to disease or insect damage.

DO NOT apply to frost affected crops or if frosts are imminent.

DO NOT apply when heavy rain is expected within 4 hours.

CROP	WEEDS CONTROLLED	STAGE OF WEED GROWTH	STATE	RATE	CRITICAL COMMENTS
CEREALS Wheat, Barley, Oats, Triticale, Cereal rye (including cereals undersown with clover)  PASTURE Newly Sown and Established Clover based pasture, Clover for Hay and Seed Production	Wild radish	Up to the 2 leaf stage and not more than 60mm in diameter	WA only	250mL/ha	<p><b>CROP STAGE</b> <b>Cereals</b> <b>Up to 750mL</b> (3 leaf to late tillering stage - Z13-30) <b>Over 750mL</b> (5 leaf to late tillering stage - Z15-30) Optimum results are achieved when sprayed at 3-5 leaf crop stage (generally 4-8 weeks post sowing). <b>WA only: DO NOT</b> apply to Barley or Kulin wheat before the 5 leaf stage (Z15). <b>Warning:</b> T-Rex may cause transient crop yellowing of cereals. Some varieties of oats have not been tested. (Refer to "Crop Tolerance" section of <b>General Instructions</b>).</p> <p><b>Clover</b> Application is recommended prior to the eight trifoliolate leaf stage, however, applications prior to the third leaf stage may result in crop damage especially under stressed conditions and in sandy soils.  DO NOT apply to Annual Medics.  <b>Warning:</b> T-Rex may cause transient crop yellowing of clover, and may affect growth and seed set of some varieties of clover. (Refer to "Crop Tolerance" section of <b>General Instructions</b>).</p> <p><b>WEED STAGE</b> Apply when weeds are actively growing. In most situations the rate specified for each weed size will give satisfactory control. Under certain conditions such as:  <ul style="list-style-type: none"> <li>• high crop and weed density</li> <li>• late season germinations</li> <li>• abnormal weed growth (including early flowering), high rate of product (up to the maximum rate of application specified for that weed) may be required.</li> </ul>           T-Rex will not effectively control:  <ul style="list-style-type: none"> <li>• regrowth of suppressed weeds;</li> <li>• transplanted weeds;</li> <li>• regrowth from rhizomes or roots;</li> <li>• weeds growing under stress from previous herbicide applications.</li> </ul> <p><b>GRAZING</b> Efficacy on larger weeds will be improved by grazing with normal levels of stock after 7 day withholding period. Refer to 'Protection of Livestock' for grazing precautions.</p> <p><b>APPLICATION</b> Activity of this product will be reduced if weeds are stressed. Optimum results will be obtained if good soil moisture exists at and after application. Where crop or weed density is high, water volume should be increased.</p> <p><b>WILD RADISH</b> T-Rex will provide residual control of wild radish for up to 4 weeks after application. Effective residual activity of this product may be reduced where:  <ul style="list-style-type: none"> <li>• rates lower than 1L/ha are used;</li> <li>• dry conditions prevail;</li> <li>• poor coverage of the soil surface is achieved;</li> <li>• crop is planted in non-wetting sand;</li> <li>• soils contain a high content of organic matter.</li> </ul>           Optimum results will be obtained if good soil moisture exists at and after application.</p> </p>
		Up to the 4 leaf stage and not more than 120mm in diameter	All States	500mL/ha	
		Up to the 6 leaf stage and not more than 150mm in diameter		750mL/ha	
		Up to the 8 leaf stage and not more than 180mm in diameter		1L/ha

MCPA (500g/L)	<p><b>Refer also to all Critical Comments relating to weed stage, grazing, application and wild radish above.</b></p> <p>^ Reduced efficacy (suppression only) maybe achieved on wild radish larger than 8 leaf or greater than 180mm in diameter.</p> <p>DO NOT use this tank-mix if cereals are undersown with lucerne or annual medics.</p> <p><u>Crop Stage</u></p> <p>T-Rex 350mL/ha + L.V.E. MCPA 200mL/ha: Apply from 3 leaf to fully tillered (Z13-30).</p> <p>T-Rex 500mL/ha + L.V.E. MCPA 200mL/ha: Apply from 3 leaf to fully tillered (Z13-30).</p> <p>T-Rex 500mL/ha + L.V.E. MCPA 400mL/ha: Apply from 5 leaf stage to fully tillered (Z16-30).</p> <p>Optimum results are achieved when sprayed at 3-5 leaf crop stage (generally 4-8 weeks post-sowing).</p> <p><b>WA only:</b> DO NOT apply to Barley or Kulin wheat before the 5 leaf stage (Z15).</p> <p><b>Warning:</b> T-Rex may cause transient crop yellowing of cereals. Some varieties of oats have not been tested. (Refer to "Crop Tolerance" section of General Instructions).</p> <p>Observe instructions also on L.V.E. MCPA. product label.</p>
		Up to the 6 leaf stage and not more than 150mm in diameter		500mL/ha plus 200mL/ha L.V.E. MCPA (500g/L)	
		Up to the 8 leaf stage and not more than 180mm in diameter^		500mL/ha plus 400mL/ha L.V.E. MCPA (500g/L)	

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

WITHHOLDING PERIODS (WHP): DO NOT GRAZE OR CUT FOR STOCK FOOD FOR 7 DAYS AFTER APPLICATION.

## GENERAL INSTRUCTIONS

## WEED LIST

## Weed

Canola (Rape)	<i>Brassica napus</i>
Capeweed	<i>Arctotheca calendula</i>
Charlock	<i>Sinapis arvensis</i>
Chickweed	<i>Stellaria media</i>
Common sowthistle (Milk thistle)	<i>Sonchus oleraceus</i>
Corn gromwell	<i>Buglossoides arvensis</i>
Cowvine	<i>Ipomoea lonchophylla</i>
Crassula	<i>Crassula</i> spp.
Deadnettle	<i>Lamium amplexicaule</i>
Dense-flower fumitory	<i>Fumaria densiflora</i>
Dock	<i>Rumex</i> spp.
Doublegee (Spiny emex)	<i>Emex australis</i>
Fat hen	<i>Chenopodium album</i>
Fireweed	<i>Senecio</i> spp.
Fumitory	<i>Fumitory</i> spp.
Hedge mustard	<i>Sisymbrium officinale</i>
Hexham scent (King Island Melilot)	<i>Melilotus indicus</i>
Horehound	<i>Marrubium vulgare</i>
Hyssop loosestrife	<i>Lythrum hyssopifolia</i>
Iceplant	<i>Mesembryanthemum</i> spp.
Indian hedge mustard	<i>Sisymbrium orientale</i>
London rocket	<i>Sisymbrium irio</i>
Long storksbill	<i>Erodium botrys</i>
Marshmallow	<i>Malva parviflora</i>

## Weed

Mouse-eared chickweed	<i>Cerastium glomeratum</i>
Night-scented stock	<i>Matthiola longipetala</i>
Paterson's curse	<i>Echium plantagineum</i>
Peppercress	<i>Lepidium</i> spp.
Prickly lettuce	<i>Lactuca serriola</i>
Purple goosefoot	<i>Scleroblitum atriplicinum</i>
Rough poppy	<i>Papaver hybridum</i>
Saffron thistle	<i>Carthamus lanatus</i>
Scarlet pimpernel	<i>Anagallis arvensis</i>
Shepherd's purse	<i>Capsella bursa-pastoris</i>
Skeleton weed	<i>Chondrilla juncea</i>
Sorrel	<i>Rumex</i> spp.
Stemless thistle	<i>Onopordum acaulon</i>
Toad rush	<i>Juncus bufonius</i>
Tree hogweed	<i>Polygonum patulum</i>
Turnip weed	<i>Rapistrum rugosum</i>
Varigated thistle	<i>Silybum marianum</i>
Vetch (Tares)	<i>Vicia sativa</i>
Volunteer lupins	<i>Lupinus</i> spp.
Ward's weed	<i>Carrichtera annua</i>
Wild radish	<i>Raphanus raphanistrum</i>
Wild turnip	<i>Brassica tournefortii</i>
Wireweed (Hogweed)	<i>Polygonum aviculare</i>

## CROP TOLERANCE

Some pre-emergence herbicides, such as atrazine, can cause stress to certain crops resulting in an increase in crop damage when using this product. Sub. clover is particularly sensitive.

## CEREALS

After application some transient crop yellowing may occur. This usually appears as yellow or white banding on leaves. Provided the crop is not under stress from pre-emergent herbicide, root disease, insect damage, frost, dry or excessively moist conditions, the development of the crop and subsequent growth will be unaffected.

## WARNING (OATS)

The tolerance of varieties Esk and Nile (the two main varieties grown in Tasmania) to T-Rex has not been tested. Test a small area of crop before using T-Rex over large areas. Consult your local Nufarm Australia representative for advice on specific varieties.

## PASTURE

The tolerance of clover varieties to T-Rex can vary with rate of application, soil type, crop health, stage of growth and degree of moisture and temperature stress.

## WARNING

T-Rex may result in transient crop yellowing and suppression of growth with a resultant initial reduction in dry matter, particularly at rates in excess of 500mL/ha and in areas of double spray. For this reason application is recommended prior to the 8<sup>th</sup> trifoliolate leaf stage. However, at the lower rates (500mL/ha and less) and under normal growing conditions, subsequent growth and seed yield should not be affected.

Under normal growing conditions, the following varieties have shown acceptable levels of foliage tolerance to T-Rex applied at 500mL/ha:

**Arrow Leaf:** Zulu

**Balansa:** Paradana

**Berseem:** Sacromonte

**Persian:** Kyambro, Lupers, Maral

**White:** Haifa

**Subterranean Clover:** Daliak, Dalkeith, Denmark, Esperance, Geraldton, Goulburn, Karridale, Larissa, Leura, Mt. Barker, Nungarin, Rosedale, Seaton Park, Trikkala and Woogenellup. The effects of T-Rex on clover seed yield have been tested on the following varieties.

Under normal growing conditions they show levels of tolerance to T-Rex applied at 500mL/ha

**Subterranean Clover:** Esperance, Goulburn, Larissa, Seaton Park and Trikkala.

## WARNING

Rose and Strawberry clover have shown increased sensitivity to T-Rex. T-Rex may affect the seed of yield of subterranean variety Woogenellup. Some pasture grasses, including Phalaris and Cocksfoot, may show some initial reduction in vegetative growth after application of T-Rex. Care should be exercised if sensitive clover varieties or grasses are included in the pasture sward.

Varieties not listed should be tested before using T-Rex over large areas. Consult your local Nufarm Australia representative for advice on specific varieties.

## SUBSEQUENT CROPS

To reduce effect on susceptible crops (eg canola), ensure thorough cultivation of soil prior to the sowing of these crops.

## MIXING

To ensure even mixing, half fill the spray tank with clean water and add the required amount of product. Agitate thoroughly then add the remainder of the water. Agitate again before spraying commences. Reseal part-used product container immediately after use. Spray

mixtures containing T-Rex should not be left to stand overnight. Prolonged periods of exposure to cold temperature could result in settling out of the product in the mixture.

#### WARNING

The rubber components present in some spraying units may be affected by exposure to the solvents in T-Rex and some other agricultural products. To reduce the risk it is recommended that the spray unit be thoroughly washed with a boom cleaner and freshwater after use. Contact the spray unit manufacturer to determine the suitability of the rubber components for use with agricultural products.

#### APPLICATION

##### Boom Sprayer

A minimum of 50L of water per hectare should be used, however, for optimum results water rates of 70-100L/ha are recommended. Increase the water volume if weed infestation is heavy or crop cover is dense. Complete coverage of weeds is essential.

##### Aircraft (NSW, Vic, SA only)

Apply in a minimum of 30L water per hectare. Effective control will only be achieved where good coverage of leaf surface is achieved.

#### RESISTANCE WEEDS WARNING

GROUP	<b>F</b>	<b>I</b>	HERBICIDE
-------	----------	----------	-----------

T-Rex Selective Herbicide is a member of the phenoxy and nicotinanalide groups of herbicides and acts by inhibiting carotenoid biosynthesis and disrupting plant cell growth. For weed resistance management T-Rex is both a Group F and a Group I herbicide. Some naturally occurring weed biotypes resistant to T-Rex and other Group F and Group I herbicides may exist through normal genetic variability in any weed population if these herbicides are used repeatedly. These resistant weeds will not be controlled by T-Rex or other Group F or Group I herbicides. Since the occurrence of resistant weeds is difficult to detect prior to use, Nufarm Australia Limited accepts no liability for any losses that may result from the failure of T-Rex to control resistant weeds.

#### COMPATIBILITY

The following products are physically compatible with T-Rex as a two-way mixture in the spray tank but should only be used for the crops specified:

Crop	T-Rex	Compatible Product
Wheat, Triticale and Cereal rye only	Up to 750mL/ha	,Nugrass® (also barley), Puma* Progress (wild oats only), Tristar* Advance (1.5L rate only), Wildcat* (wild oats only)
Cereals (including undersown)	All rates	Chlorpyrifos (500g/L), Saboteur*
Cereals (not undersown)	Up to 500mL/ha	Associate®/Brushkiller®, Lusta®, L.V.E. MCPA, Nugran®
	All rates	Bromicide® 200, Amine 625, Archer®, Tordon* 50-D, Kamba® Dry (up to 115g only), Eclipse*
Wheat, Barley, Triticale, and Cereal rye only (not undersown)		Achieve*
Wheat only (not undersown)		Topik*
Clover	Up to 750mL/ha	Targa*, Fusilade*
		Simagranz + Shirquat® mixture
Sub. clover	Up to 1L/ha	Butress®

When mixing with other herbicides, crop yellowing may be enhanced. When mixing with Nugrass®, Wildcat\*, Puma\* Progress or Tristar\* Advance some reduction in the efficacy and speed of action of these products may occur. If the crop is stressed, the application of the herbicide tank-mixtures may cause yield reduction. When mixing with Kamba® Dry a temporary wilting may be evident in some crops after application. Growers should seek advice before spraying recently released cereal varieties.

Use the recommended rates for both herbicides in the tank-mixture as well as the surfactant recommendation of the grass herbicide. If another herbicide is applied as a tank mix, observe the plant back restrictions on that label. DO NOT add surfactant when mixing T-Rex and Ally\*/Associate\*.

**Simagranz:** Refer to the simagranz label for correct application rates, especially with regard to soil types.

This product may be mixed in the spray tank with one of the following insecticides according to the directions for use on the product: Mascot™ Duo, Karate\*, Decis Forte\* EC, and Astral\*.

#### WARNING

DO NOT apply under weather conditions, or from spraying equipment, that may cause spray vapour to drift onto nearby susceptible plants/crops (such as cotton, tobacco, tomatoes, vines, lupins, fruit trees and ornamentals), cropping lands or pastures.

#### PROTECTION OF CROPS, NATIVE AND OTHER NON-TARGET PLANTS

DO NOT apply under weather conditions, or from spraying equipment, that may cause spray to drift onto nearby non-target plants/crops, cropping lands or pastures.

#### PROTECTION OF LIVESTOCK

##### Grazing Precaution

Sprayed weeds may become more palatable to stock and a higher intake of some weeds may result in stock poisoning and death from causes such as nitrate poisoning. Care should be taken especially where capeweed, Paterson's curse and variegated thistles predominate in the pasture. Avoid grazing with young or breeding stock. DO NOT graze horses or pigs on Paterson's curse. If in doubt, contact your nearest Department of Agriculture.

#### PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT

Dangerous to fish. DO NOT contaminate streams, rivers or waterways with the chemical or used containers.

[spraywisedecisions.com.au](http://spraywisedecisions.com.au) is an online weather forecasting program and is recommended for use when planning your pesticide application.

#### STORAGE AND DISPOSAL

Store in the closed, original container in a cool, well-ventilated area. DO NOT store for prolonged periods in direct sunlight. Triple or preferably pressure rinse containers before disposal. Add rinsings to spray tank. DO NOT dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point. If not recycling, break, crush or puncture and bury empty containers in a local authority landfill. If no landfill is available, bury the containers below 500mm in a disposal pit specifically marked and setup for this purpose clear of waterways, desirable vegetation and tree roots. Empty containers and products should NOT be burnt.

#### *Envirodrum 110L Mini Bulk Returnable Container (110L only)*

DO NOT tamper with the Micro Matic valve or the security seal. DO NOT contaminate the Envirodrum with water or any other foreign matter. After each use of the product, please ensure that the Micro Matic coupler, delivery system and hoses are disconnected, triple rinsed with clean water and drained accordingly. When the contents of the Envirodrum have been used, please return the empty Envirodrum to the point of purchase. The Envirodrum remains the property of Nufarm Australia Limited.

#### *Refillable containers (1000L)*

Store in the closed, original container in a dry, cool, well-ventilated area. DO NOT store for prolonged periods in direct sunlight. Empty contents fully into application equipment. Close all valves and return to point of supply for refill or storage.

#### SAFETY DIRECTIONS

Harmful if swallowed. Will damage eyes. Will irritate the skin. Avoid contact with eyes and skin. DO NOT inhale vapour. When opening the container, preparing spray and using the prepared spray, wear cotton overalls buttoned to the neck and wrist, washable hat, elbow length PVC gloves and goggles. If product in eyes, wash it out immediately with water. After use and before eating, drinking or smoking, wash hands, arms and face thoroughly with soap and water. After each day's use wash gloves, goggles and contaminated clothing.

#### FIRST AID

If poisoning occurs, contact a doctor or Poisons Information Centre (Phone Australia 13 11 26). If swallowed, DO NOT induce vomiting. Give a glass of water. If in eyes wash out immediately with water.

#### ADDITIONAL STATEMENTS (WHS REGULATIONS 2011)

**May damage fertility or the unborn child. May cause respiratory irritation. Harmful in contact with skin and if inhaled.** Do not eat, drink or smoke when using this product. Wear eye and face protection. Avoid breathing spray. Use only outdoors or in a well ventilated area. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice / attention. IF ON SKIN: Wash with plenty of soap and water. If skin irritation occurs: Get medical advice / attention. IF SWALLOWED: Rinse mouth

#### SAFETY DATA SHEET

For further information refer to the Safety Data Sheet (SDS), which can be obtained from your supplier or from the Nufarm website – [nufarm.com.au](http://nufarm.com.au)

In case of emergency: Phone 1800 033 498 Ask for shift supervisor. Toll free 24 hours.

#### CONDITIONS OF SALE

"Any provisions or rights under the Competition and Consumer Act 2010 or relevant state legislation which cannot be excluded by those statutes or by law are not intended to be excluded by these conditions of sale. Subject to the foregoing, all warranties, conditions, rights and remedies, expressed or implied under common law, statute or otherwise, in relation to the sale, supply, use or application of this product, are excluded. Nufarm Australia Limited and/or its affiliates ("Nufarm") shall not accept any liability whatsoever (including consequential loss), or howsoever arising (including negligence) for any damage, injury or death connected with the sale, supply, use or application of this product except for liability which cannot be excluded by statute."
