

TECHNOTE BS1000 - THE BETTER WETTER

Bio-degradable wetting and spreading agent.

A spray activator for use with knockdown and residual herbicides.

Non-flammable, low toxicity.

BS 1000 is available in 110 L and 1000 L returnable containers.

DIRECTIONS FOR USE

SITUATION	STATE	APPLICATION RATE	CRITICAL COMMENTS
General weed killing sprays, High vol. power spray, Low vol. boom spray, Misting machines, Knapsack	All states	10 mL/100L 40 mL/100L 5 mL/5L 2 mL/15L	
Reglone, High vol. power spray, Boom spray, Knapsack		120 mL/100L 120 mL/100L 20 mL/15L	For maximum efficiency of this herbicide a higher rate of BS1000 must be used to ensure even and thorough coverage of plant foliage and to increase absorption. This is particularly important for killing grasses and tall, dense vegetation.
Shirquat 250®/Gramoxone* 250, Spray.Seed* 250		60 mL/100L 120 mL/100L	These formulations contain wetting agents and BS1000 is only required if dilution rates are excessive. ie. low chemical rates and high water rates per ha. Consult product labels before using.
Tryquat* 200		200 mL/100L	If volume of water applied when using 3-4 L Tryquat 200 exceeds 200 L/ha.
		100 mL/100L	When using Tryquat 200 at 300-400 mL/100L.
Fusilade*		200 mL/100L	Use this rate unless otherwise specified on the Fusilade label.
		120 mL/100L	Some vegetables and ornamentals.
Hoegrass*	WA only	250 mL/100L	Use BS1000 at 250 mL when mixing Hoegrass with Homyx*, Tigrex*, or MCPA LVE. DO NOT add BS1000 with mixtures of hoegrass and linuron, bromoxynil or methabenzthiazuron.
Soil Residual Herbicides eg. Diurex® WG, Atradex® WG	All states	100-400 mL/100L	When applying soil active herbicides such as Diurex 900WG or Atradex 900WG to standing weeds, add BS1000 to thoroughly wet foliage. Consult product labels for individual recommendations.
Fire fighting, Water tanker, Knapsack		5 mL/100L 2 mL/15 L	In this field, BS1000 has the advantages of less weight to carry compared with less concentrated surfactants and of being non-flammable. It increases the wetting power of water which assists in quick control and mopping up of fires. It is of particular value where water may not be readily available as a less drenching spray is needed and a tankful will cover a bigger area.
