

## TECHNOTE

# COBBER 475 - UNBEATABLE COMPATIBILITY

**Cobber is a Group I Herbicide that is used for the control of broadleaf weeds prior to sowing crops and pastures in conservation tillage situations and for selective weed control in crops.**

Cobber 475 has a water soluble liquid formulation with non-selective herbicidal activity against broadleaf weeds. It is absorbed by plant foliage and accumulates to toxic levels in the regions of growth and reproduction, upsetting the ability of plants to balance the synthesis and use of nutrients. Visible effects are a gradual yellowing and wilting of the plants which advances to complete browning of above ground growth and deterioration of root systems.

### OPTIMUM COMPATIBILITY

- Most compatible formulation with Gladiator Optimax.
- Most compatible formulation with most other glyphosate's.
- Improved broadleaf control in fallow and pre plant.
- Compatibility enables both herbicides to have maximum effect on target weeds.

### INNOVATIVE TECHNOLOGY

- Cobber 475 is based on dual salt technology.
- It has increased compatibility with glyphosate products.
- Non volatile formulation.
- Contains a sequestering agent.

### AUSTRALIAN MADE FOR AUSTRALIAN CONDITIONS

- Stable in hard water.
- Some formulations are unstable in hard water.
- Stable up to 0°C as per APVMA guidelines.

For more information on Cobber, contact your local Nufarm Territory Manager.

### COBBER 475

High loaded formulation	✓
Compatible with most glyphosates	✓
Compatible with Gladiator OptiMAX	✓
Can be used in hard water up to 1000ppm	✓
Can be applied in low water volumes	✓
Non volatile formulation	✓
Contains a sequestering agent	✓

### COMPATIBILITY TRIALS

1000 PPM water hardness.

Duration 30 minutes.

1 L/ha Generic Amine 625 +  
1 L/ha Gladiator OptiMAX

1.6 L/ha Cobber 475 +  
1 L/ha Gladiator OptiMAX
