

TECHNOTE

NEW RESIDUAL PRE-EMERGENT HERBICIDE

Nufarm has been developing flumioxazin globally and Terrain in Australia as a new herbicide option for farmers. Now Nufarm can offer Australian growers and users a new use pattern for Terrain. This new use provides growers an extra management tool to assist in the control of some hard to kill weeds as per the directions for use on the label.

TERRAIN OFFERS

- Unique residual Group G herbicide when used at rates above 120 g/ha.
- A new pre-emergent use pattern of 180 g/ha in faba beans, field peas and chick peas.
- A new pre-emergent use pattern of 120 g/ha in wheat.

TERRAIN PROVIDES

- Improves weed control when mixed with weedmaster ARGO or weedmaster DST.
- A new management tool for resistant weeds including trifluralin resistant annual ryegrass.
- A new management tool to assist in the control of resistant weeds such as sow thistle, RoundUp Ready canola, Indian hedge mustard and wild radish.
- Excellent compatibility with all pre-emergent herbicides to enable growers to select the best option for their situation.

For more information on Terrain, contact your local Nufarm Territory Manager.
