

CORRECT MIXING OF CRYSTALLINE AMMONIUM SULPHATE (CAMS)

TANK MIXING PROCEDURE

The correct mixing order and water rates are important to maintain physical compatibility. When using bore water;

1. Fill the spray tank to at least 70% with water
2. Run agitation and add CAMS – allow 10 minutes to dissolve fully before moving onto the next step
3. Add Amicide® Advance 700
4. Fill the tank to 90% with water
5. Add weedmaster® ARGO®

ENSURE CRYSTALLINE AMMONIUM SULPHATE DISSOLVES FULLY PRIOR TO MOVING ONTO THE NEXT STEP

The time to dissolve CAMS will vary according to:

- The quality of CAMS
- The level of water in the tank
- The amount of agitation
- Water temperature

Work carried out in the Nufarm laboratory shows that complete dissolution of CAMS can vary from 5 to 9 minutes, depending on the product quality. Any 2,4-D amine that comes in direct contact with undissolved CAMS can 'drop-out', forming an insoluble precipitate that can often lead to blocked filters. For complete confidence, Nufarm Liase® can be used.

Nufarm
Amicide[®]
 ADVANCE 700 Selective Herbicide

- 700 g/L 2,4-D dual salt patented formulation
- Designed specifically to tank mix with weedmaster herbicides
- Registered for both in crop and fallow use
- A world first, developed for Australian conditions

UM Nufarm
weedmaster[®]
dual salt technology herbicide
ARGO[®]

- 540 g/L glyphosate dual salt formulation
- The integrated surfactant package delivers market leading compatibility without the need for additional surfactants
- Low foaming formulation
- 1 hour spray to sow
- 20 minute commercial rainfast offer*

SPRAYMATE[®]
LIASE LIQUID
 HERBICIDE
 ADJUVANT

- 417 g/L ammonium sulphate liquid formulation
- Minimises the impact of hard water on glyphosate and reduces antagonism between glyphosate and other herbicides
- Minimises the effect of bicarbonates on Group A Dim chemistry
- Quality formulation with no impurities and no cooling of solution

*weedmaster ARGO delivers commercially acceptable weed control, provided it is applied according to label directions, even just 20 minutes prior to a shower. If weed control fails, Nufarm will replace up to 100% of your initial use amount of weedmaster ARGO for re-treatment. Contact your local reseller or Nufarm Area Sales Manager at www.nufarm.com.au/contacts for claims. Benefits provided to the farmers by this Rainfast Offer are in addition to other rights and remedies available to the consumer under the law.
