Registered use for the control of	<ul style="list-style-type: none">• Fruit spotting bug (<i>Amblypelta nitida</i>)• Banana spotting bug (<i>A. lutescens lutescens</i>)
Use rate	100 mL/100 L water – Fruit spotting bug, Banana spotting bug
Withholding period	14 days
Formulation	Soluble concentrate (SL)
Product pack size	5 L

BENEFITS OF NUFARM TEPPAN

- Excellent control of Fruit Spotting Bug and Banana Spotting Bug – protecting yield and quality.
- Broader spectrum diamide (Group 28) for control of Lepidoptera and true bugs, while being soft on most beneficials.
- Translaminar activity resulting in rapid feeding cessation, enhanced coverage, improved rainfastness and long lasting control.

BEST USE

For best results, apply with a non-ionic adjuvant, such as Activator at 50 mL/100 L.

Make no more than 3 applications/crop with a 14 day minimum interval between treatments.

Fruit & banana spotting bugs:

Monitor orchards and apply once economic thresholds are reached, beginning from after flowering. Apply to the point of runoff and ensure thorough coverage as this is critical for control.

COMPATIBILITY

Biological and physically compatible with:

Adjuvants: Designer, Expand, Activator and Agral 600

Fungicides: Nufarm Copper Hydroxide, Nufarm Champ DP, Tri Base blue, Amistar, Luna Sensation
