

COMPATIBILITY GUIDE.

Compatibility between products can be an important attribute to help on farm efficiencies. Nufarm Intervene is compatible with a range of other commonly used fungicides and insecticides.

Nufarm Intervene is a unique mode of action for the Australian market.

- Group 19 – offering control of Botrytis & Powdery Mildew in Vines and Berries and Powdery Mildew and Alternaria in Apples.
- Nil withholding - Low residue profile enables flexible positioning.*
- Nil marking on fruit.
- Suitable for use in IPM programs.
- Suitable for use in field and protected systems.
- An ACO Certified Allowed Input (ACO CERT. NO. 11540).

*For WHP on export wine grapes, please consult your AWRI Agrochemicals booklet ('dog book')

The tables below are a guide of compatibility for Nufarm Intervene.

The information is based on laboratory testing for physical compatibility and field trials for biological compatibility. Nufarm recommends only one additional mix partner is used per tank.

Products listed as compatible must have constant agitation.
