

A close-up photograph of a broccoli plant. The green leaves are wet with water droplets, and a single, mature broccoli head is visible in the lower center. The background is a soft-focus green.

TEPPAN

TECHNOTE

**PROTECT
YIELD AND
QUALITY.**

Nufarm Teppan is a new Group 28 insecticide, containing cyclaniliprole, and can be used in brassica and brassica leafy vegetables to control diamondback moth and other key pests.

 **nufarm** **TEPPAN[®] 50SL**

CRITICAL INFORMATION

Active ingredient	50 g/L Cyclaniliprole
Mode of action	Group 28 insecticide
Registered crops	Brassica vegetables (including Broccoli, Brussel sprouts, Cabbage and Cauliflower) Brassica Leafy Vegetables (including Chinese cabbage, Kale, Bok choy, Pak-choi, Pak-tsoi, Tat soy, Celery mustard, Mibuna)
Registered use for the control of	- Diamondback moth (<i>Plutella xylostella</i>) - Cluster caterpillar (<i>Spodoptera litura</i>) - Cabbage Cluster Caterpillar (<i>Crociodolomia pavonana</i>) - Cabbage white (<i>Pieris rapae</i>) - Cabbage Centre Grub (<i>Hellula hydrates</i>)
Use rate	40 mL/100 L water or 400 mL/ha
Withholding period	1 day
Formulation	Soluble concentrate (SL)
Product pack size	5 L

BENEFITS OF TEPPAN

- Strongest Group 28 for diamondback moth control and overall pest spectrum.
- In addition to control of eggs and early larval stages, Teppan provides adulticidal activity leading to fewer eggs present compared to other Group 28s.
- Translaminar activity resulting in rapid feeding cessation and long lasting control.

BEST USE

For best results, apply with a non-ionic adjuvant at label rate, such as Activator at 50 mL/100 L.

Time sprays to target newly hatched eggs and early larval stages once they reach economic threshold.

Make no more than 3 applications/crop with a 7 day minimum interval.

COMPATIBILITY

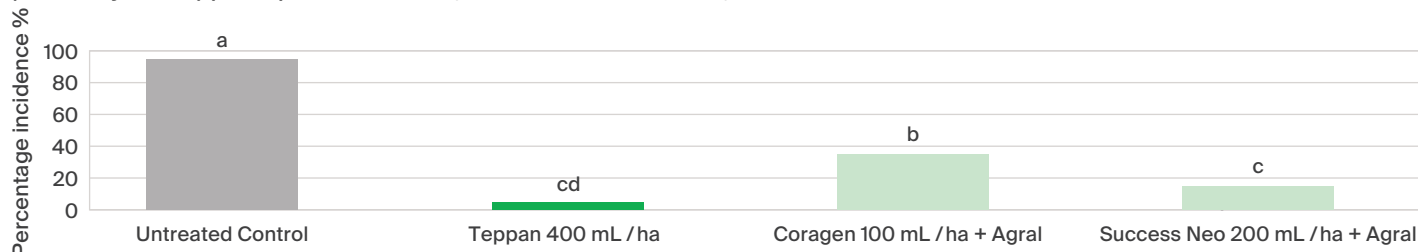

Biological and physically compatible with:

Nufarm Tri-Base Blue, Nufarm Copper Hydroxide 500, Champ DP, Amishield, Mancozeb 750, Polyram DF, Amistar 250 SC, Ranman, Infinito, Dipel, Filan.

Percent incidence of Diamondback moth Larvae

(*Plutella xylostella*) per 10 plants in broccoli, 7 DAA2 – Werribee South, 2021

(Trial ID: NULAV-21-21343506-I01)
