

BOLT Authorisation Update

The product authorisation for BOLT has been updated and now includes an extended range of permitted joint applications with other ALS herbicides, including formulations with grass weed activity.

- ✓ The MAPP number has been updated from MAPP 18753 to MAPP 21488
- ✓ Existing stocks of BOLT bearing the number MAPP 18753 may be applied in line with the revised joint application options provided a copy of the updated label text is made available to be read by operators prior to mixing/spraying and the conditions of use on the new label are met in full.

BOLT (MAPP 18753) can be sold until 31/10/2026, with a further 12 month use-up period on farm, meaning any carryover stock remaining in farm stores may be used before 31/10/2027.

A JOINT APPLICATION is the use of a product in tank mixture or sequence with another product and should only be made within the label recommendations of every product in the application.

BOLT (MAPP 21488) may be applied in joint application to the same cereal crop with one of the following ALS products:

Accurate
Accurate Extra
Ally Max SX**
Atlantis OD
