

Top fruit? Time for Boni Protect!

After a challenging growing season **Class 1 English top fruit is expected to be at a premium.**

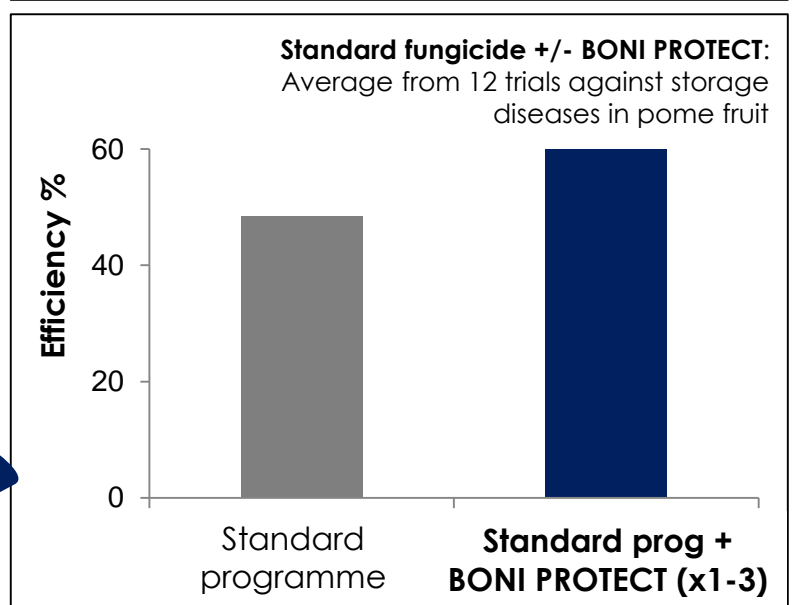

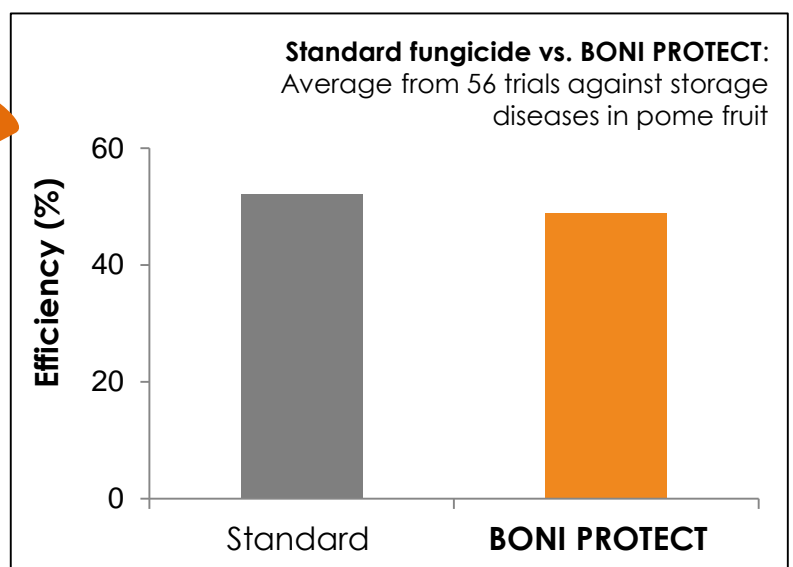

Recent rough and unsettled weather raises **further threats to quality** with late and storage diseases, at a stage where there are concerns about **conventional fungicide applications being used up, or generating residues.**

Boni Protect control of storage rots >>> REPLACEMENT of chemical fungicides

The availability of Boni Protect is very timely & offers the following advantages:

- ✓ Use close to harvest to **reduce storage rot losses and fungicide residues**
- ✓ Up to **4 applications** from beginning of ripening **to 1 day before harvest**
- ✓ Unique **anti-resistant** "blocking" mode of action, **complementary to conventional fungicides**
- ✓ **Rainfast**, unaffected by sunlight or drought
- ✓ Compatible with all usual storage regimes
- ✓ **IPM compatible** – safe to bees and beneficial insects
- ✓ Approved for use in **organic** crops

Boni Protect control of storage rots >>> IN ADDITION to chemical fungicides
