

## Which brand of Metsulfuron?

There are a number of versions of metsulfuron-methyl available for growers, but only Accurate can offer the combination of higher efficacy, crop safety and wider choice of herbicide partners and sequences

Nufarm MSM showed greater activity in trials than competitor SX formulations

Accurate is an excellent WDG formulation which requires the use of All Clear following use but does not suffer the sedimentation and tank residue issue of early SU formulations

## Accurate: greater flexibility

Accurate may be used in tank mix or sequence with any one listed ALS or SU herbicide, including broad leaf weed herbicides such as tribenuron or thifensulfuron **unlike any competitor MSM product**
