

Check winter wheat crops now to avoid this

Uncontrolled poppies in winter wheat can be severely damaging to yield and price. Over reliance on ALS herbicides has resulted in an increase in weeds such as poppies appearing in the crop at late growth stages with potentially embarrassing consequences.

Easel (MCPA 750g/l) is not affected by ALS resistance and will provide effective and safe control of poppies up to GS39 (flag leaf collar just visible) in winter wheat and has been safely mixed with T2 fungicides in trials (Contact Nufarm for further information)

Source: OAT Ltd Haltham, Easel 2.2L l/ha + Ignite 1.5 l/ha applied 19th May, crop GS37. Final control level 92%

FURTHER INFORMATION

Nufarm Technical updates are eligible for 1 BASIS CPD/year Ref: CP/81650/1920/g. Email claim to linda@basis-reg.co.uk

- Easel contains MCPA
- Ignite contains epoxiconazole
- Easel is a Nufarm trademark
- Ignite is a trademark of BASF AG

Details of application rates and timings are given in Nufarm labels and product literature, both of which can be accessed from our website www.nufarm.com/uk. Alternatively, ring the Nufarm helpline on 01274 694714, Monday to Friday 9.00 - 17.00

Use plant protection products safely. Always read the label and product information before use. For label and safety information, refer to the Nufarm website www.nufarm.com/uk. Nufarm UK Ltd, Wyke Lane, Bradford, BD12 9EJ.
