

Product Information Sheet

Reviewed March 2025

Product	PRAIRIE VERTE – a growth promoter & sward recovery agent			
Active ingredient:	Vegetal actives extracted from fresh plants, (no nutrient content NPK)			
Formulation:	Soluble Concentrate (SL)			
MAPP number:	N/A			
Mode of Action:	Biostimulant (Approved in France, Marketing Approval No. 1190126) Phyto stimulatory effect that boosts regrowth of grass crops – can be applied in mix with herbicides to promote grass competitiveness and re-growth following weed removal			
Pack size:	1 litre (treats 2 ha)			
Aquatic buffer zone	N/A			
Non-target Arthropod	N/A			
Benefits	<ul style="list-style-type: none"> • Convenient application, alone or in mix with grassland herbicides • Improves grass recovery and sward rejuvenation, following weed removal • Improves livestock productivity from the grazing platform 			
RECOMMENDATIONS	Apply PRAIRIE VERTE in tank mix with any grassland herbicide. No extra spray applications are needed.			
Crops	Full dose	Total dose	No. of application	Latest time of application
Grassland	0.5L/ha	N/A	-	See label of tank mix partner
Amenity grassland, Managed amenity turf	0.5L/ha	N/A	-	See label of tank mix partner

Notes	<p>PRAIRIE VERTE is a true biostimulant rather than a product containing nutrients (NPK). PRAIRIE VERTE is systemic and promotes both photosynthesis and translocation to the roots in all plants, this delivers improved herbicide action in weed species and improved dry matter yield in ryegrass (+12% in trials), also improved digestibility of grass (+18% total circulating sugars)</p>
Additional activity	Crop tolerance to abiotic stress – drought, cold, herbicide scorch
Time of application	April to end September - apply with a partner herbicide to actively growing weeds
Wash-out procedure	Wash out spray equipment thoroughly with water and detergent immediately after use.

Agronomy Solutions for agricultural grassland	<p>THRUST 3.5 l/ha + PRAIRIE VERTE 0.5 l/ha <i>Control of Docks, Ragwort, thistles</i></p> <p>PASTUREMASTER 3.5 l/ha + PRAIRIE VERTE 0.5 l/ha <i>Control of Buttercup, Ragwort, thistles</i></p> <p>DEPITONE ULTRA 1.25 l/ha + TOMAHAWK 1.25 l/ha + PRAIRIE VERTE 0.5 l/ha <i>Control of Dandelion, buttercup, chickweed, seeding docks</i></p> <p>AGRITOX 3.3 l/ha + PRAIRIE VERTE 0.5 l/ha <i>Control of Thistles and Soft Rush</i></p> <p>NETTLEX 60 at 60 ml + PRAIRIE VERTE 25 ml in 10 litres water <i>Knapsack spot treatment for nettles, docks, thistles, bramble, broom and gorse</i></p> <p>PRAIRIE VERTE 0.5 l/ha is compatible with Corteva range of grassland herbicides</p>	
Water Volume	Minimum water (at full dose)	Recommended water (label)
	-	200 litres of water per hectare
Best Use Advice	Include with every herbicide treatment in grassland for improved weed control & faster sward recovery – a more vigorous & competitively growing grass sward will fill gaps and smother weeds better.	
Tank Mix	Compatible with all major brands of grassland herbicides such as: <ul style="list-style-type: none"> • PASTUREMASTER, POLO, LUPO (MCPA + 2,4-D) • THRUST, MAGNETO (2,4-D + dicamba) • AGRITOX, EASEL, LARKE (MCPA) • TOMAHAWK (fluroxypyr) • DEPITONE ULTRA (2,4-D ester) • NETTLEX 60 (triclopyr + clopyralid) • TURFMASTER (mecoprop-P + MCPA + dicamba) Further information on tank-mixing (physical compatibility) is available at Tank Mix - Nufarm UK	
Grazing Interval	N/A – revert to label of tank mix partner	
Cutting Interval	3 weeks – advisory to allow full translocation of partner herbicide	
Overseeding Interval	N/A – revert to label of tank mix partner	
Clover Safety (Yes or No)	Yes (PRAIRIE VERTE applied alone)	
Handheld Applicator (Yes or No)	Yes 25ml PRAIRIE VERTE in 10 litres of water treats 500m ² (for sprayers calibrated to 200 l/ha water volume).	
Following Crop Information	N/A – revert to label of tank mix partner
