Grassmanship Agronomy Solutions

Grassmanship Agronomy Solutions

Forage Friendly weed control and Foliar Biostimulation in Grassland

Kyleo contains 240 g/l glyphosate + 160 g/l 2,4-D
 Nettlex 60 contains 240 g/l triclopyr + 60 g/l clopyralid
 Pasture Master contains 360 g/l 2,4-D + 315 g/l MCPA
 Prairie Verte contains non purified plant extract
 Thrust contains 344 g/l 2,4-D + 120 g/l dicamba
 Tomahawk contains 200 g/l fluroxypyr

Agritox, Kyleo, Thrust, Nettlex, Tomahawk, Magneto, Lupo and Polo are registered trademarks of Nufarm.

Livestock should be excluded from treated areas until any Ragwort has completely died and there is no visible sign of the dead weed.

Use plant protection products safely.

Always read the label and product information before use.

For label and safety information, please refer to the Nufarm website: nufarm.com/uk

Protect Your Water

Ensure only certified sprayer operators and equipment are used to apply the products.

Use Plant Protection Products safely.

Observe all product buffer zones.

Do not exceed the maximum application rate.

Do not fill or wash down sprayer in yard unless measures to collect washings for safe disposal in place.

Do not use on waterlogged fields, if tyre marks are visible, the field is too wet.

Clean and wash down your sprayer at the end of the day, well away from water bodies or open drains.

Do not use if rainfall is expected. Apply on a calm day when weather conditions are good.

Weed Control Chart

GRASSLAND WEEDS (pre flowering, leafy stage)	Established Grass >1 year						New Sown Leys < 1 year
