

Sebring® 480 FS

SEED TREATMENT

INCREASE STANDS AND PROTECT AGAINST DISEASE.

Sebring® 480 FS is a seed-applied systemic fungicide containing metalaxyl. Systemic activity means the active ingredient in Sebring is translocated to all parts of the plant during germination. Sebring 480 FS offers excellent control of select diseases, protecting the seed, roots and emerging plants against systemic downy mildew, Pythium and Phytophthora. Plus, Sebring 480 FS can be applied as a stand-alone seed protectant or in combination with other seed treatment products for optimum flexibility.

COMPETITIVE ADVANTAGES

- Protects a broad range of crops against Pythium, Phytophthora and systemic downy mildew to help increase stands
- Can be applied stand-alone or in combination with other fungicides
- Systemic control activity to reach throughout growing plants
- Economical value

AT-A-GLANCE INFO

EPA REG. NO.	55146-106
ACTIVE INGR.	metalaxyl (480 g/l)
FORMULATION	flowable
CHEM. FAMILY	phenylamide
FRAC NO.	4
MODE OF ACT.	nucleic acid synthesis
SIGNAL WORD	caution
RES. USE	no
PACKAGE SIZE	1 gal container (4 per case), 30 gal drum, 250 gal tote, for custom blend
COLORED	no
COMPARE TO	proprietary formulation

Sebring® 480 FS

INCREASE STANDS AND PROTECT AGAINST DISEASE.

LABELED CROPS

Beets: garden, sugarbeets
Canola*, mustard seed*, rapeseed*
Carrots*
Cotton
Cucumbers*
Forage grasses
Forage legumes
Grain crops: barley, buckwheat,
corn (field corn, sweet corn and
popcorn), millet, milo, oats, rye,
triticale, and wheat
Peanuts*
Rice*
Seed and pod vegetables
Sorghum
Soybeans
Spinach*
Sunflowers
Turfgrasses

KEY DISEASES CONTROLLED

(See product label for complete list)

Pythium spp.
Phytophthora spp.
Systemic downy mildews

*Not registered for use in California

APPLICATION RECOMMENDATIONS

APPLICATION RATES

0.20 to 2.00 fl oz per 100 pounds of seed. See product label for crop-specific use rates.

Sebring 480 FS can be applied with other registered seed treatment insecticides and fungicides as a water-based slurry through standard slurry or mist-type commercial seed treatment equipment.

Sebring 480 FS may be applied at 0.07 to 0.25 fl oz per 100 pounds of seed in combination with other registered fungicides to aid in control of Pythium.

See label for complete application rates and recommendations.

SEED LABELING REQUIREMENTS

"This seed has been treated with Sebring 480 FS Fungicide which contains the active ingredient metalaxyl. Do not use treated seed for food, feed, oil purposes. Store away from feed and foodstuffs. Do not harvest mustard greens. Rape greens grown and harvested from Sebring 480 FS Fungicide treated seed must not be used for human and feed consumption. Rapeseed grown and harvested from Sebring 480 FS Fungicide treated seed is only for industrial uses and cannot be used for edible oil or any other human/feed consumption."

See label for complete application rates and recommendations.
