

CottonQuik®

Harvest the Value of CottonQuik®.

CottonQuik® harvest aid accelerates the opening of mature unopened cotton bolls so you can begin picking sooner. Only CottonQuik contains a proprietary synergist to deliver rapid defoliation of cotton plants when used in combination with a proven defoliant such as FreeFall®. The synergist improves the activity of ethephon by increasing its uptake and movement within the plant.

CottonQuik allows you to use a reduced rate of defoliant while improving consistency and speeding leaf drop, which means better results and less trash for maximum lint quality.

KEY PERFORMANCE BENEFITS

- Superior boll opening that begins three to five days sooner than other products
- Delivers consistent results, even in cool weather, to help keep harvest on schedule
- Can help minimize regrowth
- Enhances defoliant activity to improve consistency and hasten leaf drop

EPA REG. NO.	228-607
ACTIVE INGR.	ethephon (18.3%), urea sulfate (58.6%)
FORMULATION	liquid
CHEM. FAMILY	phosphonic acid, monocarbamide dihydrogen sulfate
REI	48 hours
SIGNAL WORD	danger
RESTRICTED	no
PACKAGE SIZE	2 x 2.5 gal, 250 gal tote

Grow a better tomorrow.

CottonQuik®

KEY USES

Cotton defoliation
Cotton boll opening

USE SUMMARY

RATES

Stand alone: Apply 3.0 to 3.5 qts per acre for defoliation and boll opening.

Tank-mix: For most consistent defoliation and regrowth inhibition, CottonQuik® should be tank-mixed with an approved defoliant such as FreeFall®. Apply CottonQuik at 1.5 to 2.0 qts per acre in tank-mix with a defoliant for defoliation and boll opening.

SPRAY VOLUME

Air: 3 to 10 gals per acre

Ground: 10 to 30 gals per acre

Do not harvest cotton until at least 7 days after treatment with CottonQuik.

Two applications of CottonQuik are allowed per year, but do not exceed 3.5 qts per acre.

See label for complete directions for use.
