

Nuprid® 4F MAX

The Clear Choice for Tough Insects.

Nuprid® 4F Max systemic insecticide provides economical and long-lasting control of a broad spectrum of damaging insects. The expanded label allows for both soil and foliar application on a variety of crops, including citrus, cotton, grapes, lettuce, potatoes, tobacco, and fruiting, cucurbit and leafy vegetables. It offers outstanding control of aphids, whiteflies, mealybugs, Colorado potato beetles, leafhoppers and many other sucking and piercing pests. Nuprid 4F Max delivers consistent field performance, plus it's easy to mix, use and apply.

EFFECTIVE CONTROL IN A FLEXIBLE FORMULA

- Selective control of key sucking and piercing insects
- Expanded label allows for soil and foliar application on multiple crops
- Reliable performance against yield robbing pests
- Helps stop transmission of many insect-vectorated diseases
- Readily mixes with other tank-mix partners to save a trip across the field

EPA REG. NO.	228-528
ACTIVE INGR.	imidacloprid (40.4%)
FORMULATION	liquid
CHEM. FAMILY	neonicotinoid
GROUP NO.	4A
MODE OF ACT.	nicotinic acetylcholine receptor agonists
REI	12 hours
SIGNAL WORD	caution
RESTRICTED	no
PACKAGE SIZE	4 x 1 gal, 265 gal tote

Grow a better tomorrow.

Nuprid® 4F MAX

KEY USES

Berry, bush and vine crops
 Citrus
 Cotton
 Field and greenhouse vegetables
 Fruit orchards
 Peanuts
 Potatoes
 Potato seed piece treatment
 Soybeans
 Sugarbeets (*California only*)
 Tobacco
 Tree nuts

KEY PESTS CONTROLLED

(See product label for complete list)

Aphids
 Cherry fruit fly
 Fleahoppers
 Green June beetle
 Leafminer
 Mealybugs
 Mole crickets
 Plant bugs
 Sawflies
 Scales
 Termites
 Thrips
 White grub complex
 Wireworms

KEY DISEASES SUPPRESSED

(See product label for complete list)

Bacterial wilt
 Bean common mosaic virus
 Beet curly top hybrigeminivirus
 Citrus yellows
 Net necrosis
 Pecan scab
 Potato yellows
 Tomato mottle virus
 Western yellows virus

USE SUMMARY

Nuprid® 4F Max can be applied as a soil treatment, a foliar spray, via ground or aerial application, or by overhead chemigation if allowed in crop-specific recommended application section.

Thorough coverage is necessary for insect control. Use adequate spray volumes, properly calibrated application equipment, and an adjuvant to improve coverage. Nuprid 4F Max may not knockdown established and heavy insect populations with a single application. Two applications may be necessary for control. Scout fields and retreat if needed.

Do not apply more than 0.5 lbs active ingredient per acre per year, regardless of formulation or method of application, unless specified within the crop-specific recommended application section.

See label for complete directions for use.
