

Truslate® Pro

Tru Performance and Value from Truslate® Pro.

Count on Truslate® Pro, a truly new broadleaf herbicide for cereals including barley and all types of wheat. With its combination of three active ingredients in a convenient premix, Truslate Pro offers unparalleled control of broadleaf weeds - including kochia, wild buckwheat, Canada thistle, wild mustard, pigweed and lambsquarters - with excellent crop safety and outstanding tank-mix compatibility. And since it's from Nufarm, it also delivers outstanding value.

KEY PERFORMANCE BENEFITS

- Outstanding performance on tough broadleaf weeds including kochia, wild mustard, pigweed and lambsquarters
- Convenient premix of three active ingredients
- Developed to be tank-mix compatible with popular grass herbicides
- Excellent crop safety

EPA REG. NO.	71368-88
ACTIVE INGR.	MCPA (30.73%), fluroxypyr (10.37%), clopypalid (5.6%)
FORMULATION	emulsifiable concentrate
CHEM. FAMILY	phenoxy, carboxylic acid, pyridine
HRAC NO.	4
MODE OF ACT.	synthetic auxins
REI	12 hours
SIGNAL WORD	warning
RESTRICTED	no
PACKAGE SIZE	2 x 2.5 gal, 265 gal tote

KEY USES

Barley
Oats
Wheat

KEY WEEDS CONTROLLED

(See product label for complete list)

Alfalfa, volunteer (from seed)
Artichoke, Jerusalem
Buckwheat, wild
Buffalobur
Canola, volunteer
Chamomile, false (scentless)
Chamomile, mayweed (dogfennel)
Chickweed
Clover; black medic, hop, red, sweet, white
Cocklebur, common
Cornflower (bachelor button)
Dock, curly
Flax, volunteer
Flixweed
Hawksbeard, narrowleaf
Hawkweed; orange, yellow
Hemp dogbane
Horseweed (marestail)
Jimsonweed
Kochia
Ladysthumb
Lambsquarters, common
Lettuce, prickly
Mallow; common, Venice
Marshelder
Morningglory
Mustard; tumble, wild
Nightshade; black, cutleaf,
eastern black, hairy
Pennycress, field
Pigweed, redroot
Pineappleweed
Puncturevine
Purslane, common
Ragweed; common, giant
Salsify, meadow (goatsbeard)
Shepherd's-purse
Smartweed; green, Pennsylvania
Sowthistle, annual
Starthistle, yellow
Sunflower
Tansymustard, pinnate
Teasel, common
Thistle; bull, Canada, musk, Russian
Velvetleaf
Vetch

USE SUMMARY

Apply as a post-emergence broadcast treatment to actively growing wheat, barley or oats from the 3-leaf stage up to and including flag leaf emergence. Make applications to actively growing weeds 4 inches tall or vining. For perennial weeds (such as Canada thistle), apply when the majority of the basal leaves have emerged from the soil up to bud stage to obtain season-long control.

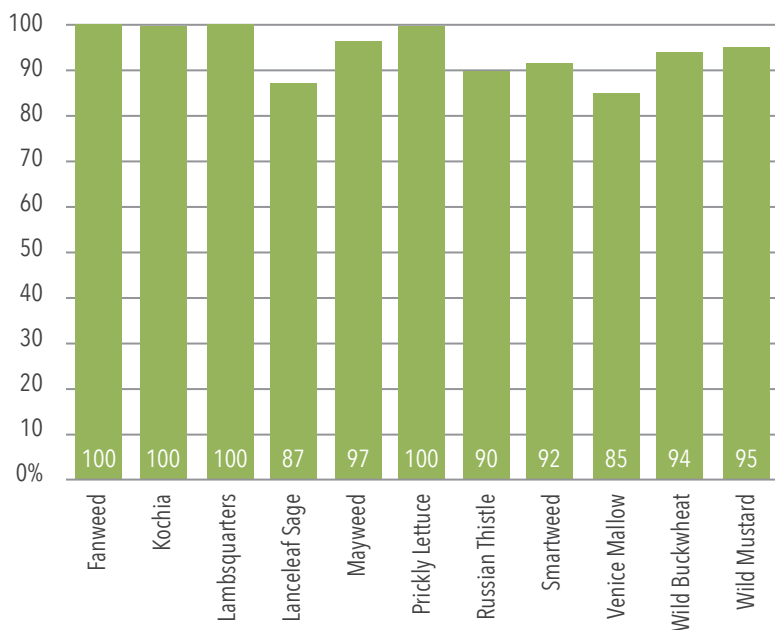

BROADCAST APPLICATION RATES

For young, succulent growth of susceptible weed species less than 4 inches tall, apply 1 to 1.5 pints per acre. Best control of kochia is achieved when kochia is at least 1 inch tall and not taller than 4 inches. For dicamba resistant kochia and volunteer potatoes, use 1.5 to 2 pints per acre. Tank-mixes with additional herbicides may be necessary when controlling less sensitive species, some perennials, and under conditions where control is more difficult (plant stress conditions such as drought or extreme temperatures, dense weed stands and/or larger weeds).
