

Weedone® LV4 Solventless

Formulated for Effective Weed Control.

Weedone® LV4 Solventless uses high-quality emulsifiers and surfactants to replace the solvent base. This low-odor formulation mixes well with most liquid fertilizers and is an excellent choice for burndown applications. A solventless formulation reduces the chance of injury to host crops and easily washes from containers and spray equipment.

KEY PERFORMANCE BENEFITS

- Contains no solvents, solvents are replaced with high-quality emulsifiers and surfactants
- Low-odor formulation
- Facilitates easier cleaning than other phenoxy herbicides
- Safer on host crop than most conventional 2,4-D herbicides

EPA REG. NO.	71368-14
ACTIVE INGR.	2,4-D ester (62.6%)
FORMULATION	liquid
CHEM. FAMILY	phenoxy-carboxylic acid
HRAC NO.	4
MODE OF ACT.	synthetic auxin growth regulator
REI	12 hours
SIGNAL WORD	caution
RESTRICTED	no
PACKAGE SIZE	2 x 2.5 gal, 30 gal, 250 gal tote

Grow a better tomorrow.

Weedone® LV4 Solventless

KEY USES

Corn (*field, popcorn †*)
 Cereal grain (*barley*, rye*, wheat**)
 Fallowland
 Grass for seed production
 Non-crop areas
 Pasture
 Rangeland
 Sorghum
 Soybeans (*preplant only*)
 Sugarcane
 † Not registered in California
 *Not underseeded with a legume

KEY WEEDS CONTROLLED

(See product label for complete list)

Bull thistle
 Burdock, common
 Canada thistle
 Catnip
 Chicory
 Cocklebur, common
 Coffeeweed
 Dandelion
 Evening primrose, common
 Garlic, wild
 Hairy galinsoga
 Healall
 Jimsonweed
 Lambsquarters, common
 Lettuce, blue
 Marshelder
 Morningglory
 Mustards (*except blue*)
 Pepperweeds (*except perennial*)
 Pigweed (*Amaranthus spp.*)
 Plantains
 Prickly lettuce
 Ragweed; common, giant
 Smartweed
 Sowthistle
 Velvetleaf
 Vetches
 Wild lettuce
 Yellow sweet clover, annual

USE SUMMARY

Crop varieties vary in response to 2,4-D and some are easily injured. Apply this product only to varieties known to be tolerant to 2,4-D. If you are uncertain concerning tolerant varieties or local use situations that may affect crop tolerance to 2,4-D consult your seed company, state Agricultural Extension Service or qualified crop consultant for advice.

RATES: Maximum Individual Application Rates

Fallowland 4 pints/Acre
 Pasture and rangeland 4 pints/Acre

Preplant/Pre-Emergent Application

Corn (*field and popcorn**) 2 pints/Acre
 Soybeans (*preplant only*) 2 pints/Acre

Post-Emergent Application

Cereal grains (*wheat, barley, rye*) 2.6 pints/Acre
 Corn (*field and popcorn**) 1 pint/Acre
 Sorghum 1 pint/Acre
 Non-crop areas (*annual and perennial weeds*) 4 pints/Acre
 Non-crop areas (*woody plants*) 8 pints/Acre

Pre-Harvest Application

Cereal grains (*wheat, barley, rye*) 1 pint/Acre
 Corn (*field and popcorn**) 3 pints/Acre

* Not currently registered for use in California

See label for complete directions for use.

APPLICATION RESTRICTIONS

Do not apply this product through any type of irrigation system.

Do not use in or near a greenhouse.

Do not use the same spray equipment for other purposes unless thoroughly cleaned. Crops contacted by sprays or spray drift may be killed or suffer significant stand loss with extensive quality and yield reduction.

See label for complete application restrictions.
