Brown patch
Fairy ring
Foliar and basal anthracnose
Gray snow mold
Large patch
Leaf spot/Melting out
Pink snow mold
Red thread
Rhizoctonia
Waitea patch
Yellow patch
Zoysia patch

USE SUMMARY

Repeat treatment on a 7-14 day schedule where environmental conditions are conducive to development of diseases. Consult your local extension agent or local recommendations for information relating to proper timing for control of these diseases.

When symptoms are present, best control will be achieved by using a shorter interval.

For best results apply after mowing.

Apply to obtain thorough plant coverage in a minimum of 66 gallons water per acre.

See label for complete directions for use.

MIXING INSTRUCTIONS

Fill spray tank with water to 1/2 of the intended final volume.

Start spray tank agitation.

Add the appropriate amount of product to the tank according to the rates in the following tables. Follow the directions above for mixing other products in the spray tank.

Agitate to ensure thorough mixing while adding the remaining required water.

Do not allow the spray mixture to stand without agitation.

Mix only the amount of spray solution needed to treat the desired area.

See label for complete mixing instructions.
