

Diablo®

Excellent Control Where You Need It.

Diablo® is a water-soluble amine formulation of dicamba that offers excellent control of tough broadleaf weeds, vines and brush in a variety of crop and non-crop settings. Diablo is an excellent stand-alone or tank-mixed herbicide that provides fast knockdown and residual control. Diablo mixes well with glyphosate herbicides for enhanced performance and resistance management.

DEPENDABLE CONTROL OF BROADLEAVES, VINES AND BRUSH

- Control of tough weeds including kochia, Russian thistle, pigweed, mustards, prickly lettuce, lambsquarters, knotweed and many other annual and perennial broadleaf weeds
- Systemic product with residual soil activity
- Non-toxic to microorganisms
- Noxious weed and brush control
- Tank-mix compatible with many other herbicides

EPA REG. NO.	228-379
ACTIVE INGR.	dicamba (49.41%)
FORMULATION	liquid
CHEM. FAMILY	benzoic acid
HRAC NO.	4
MODE OF ACT.	synthetic auxin growth regulator
REI	24 hours
SIGNAL WORD	caution
RESTRICTED	no
PACKAGE SIZE	2 x 2.5 gal, 30 gal, 265 gal tote, bulk

Diablo®

KEY USES

Asparagus
Corn
Fallowland
General farmstead (*non-cropland*)
Hay
Pasture
Rangeland
Small grains
Sorghum
Sugarcane
Turf and grass seed crops

KEY WEEDS CONTROLLED

ANNUALS

Amaranth, spiny
Beggarweed, Florida
Burdock
Clover, annual
Evening primrose, cutleaf
Knotweed
Kochia
Lambsquarters
Marestail (*horseweed*)
Mayweed
Morningglory; ivyleaf, tall
Mustard; tansy, wild, yellowtops
Nightshade, black
Pigweed; prostrate, redroot, spiny
Ragweed; common, giant
Shepherd's-purse
Smartweed; green, Pennsylvania
Thistle, Russian
Waterhemp

BIENNIALS & PERENNIALS

Burdock, common
Chicory
Fern, bracken
Garlic, wild
Hawkweed
Horsenettle, Carolina
Knapweed; black, Russian
Milkweed, climbing
Nettle, stinging
Nightshade, silverleaf
Plantain, buckhorn
Sercia lespedeza
Sowthistle
Spurge
Vetch

WOODY

Birch
Elm
Grape
Kudzu
Maple
Olive, Russian
Spruce
Willow

USE SUMMARY

The product can be applied using water, oil in water emulsions including invert systems, or sprayable fluid fertilizer as a carrier. A compatibility test should be made prior to tank mixing.

This product may be applied broadcast using either ground or aerial application equipment, apply 3 to 600 gallons of diluted spray per treated acre. Volume of spray applied will depend on the height, density, and type of weeds or brush being treated and on the type of equipment being used. When using aerial equipment, apply 1 to 40 gallons of diluted spray per treated acre in a water-based carrier.

This product may be applied to individual clumps or small areas (spot treatment) of undesirable vegetation using hand gun or similar types of application equipment. Apply diluted sprays to allow complete wetting (up to run-off) of foliage and stems.

Herbicide adjuvants or other spray additives (emulsifiers, surfactants, wetting agents, drift control agents, or penetrants) may be used for wetting, penetration, or drift control. Spray additives must be agriculturally approved when used in pasture applications. If spray additives are used, read and follow all use recommendations and precautions on product label.

Diablo® may be tank mixed with one or more herbicides for control of grasses, additional broadleaf weeds, and woody brush and vines.

Retreatments may be made as needed, however, do not exceed a total of 2 quarts (2 lbs a.i.) of Diablo per treated area per year.

Animals cannot be removed from treated area for slaughter prior to 30 days after last application. No waiting period between treatment and grazing for non-lactating animals.

See label for complete directions for use.
