Trooper™ 22K Trooper™ P+D

Broadleaf Selective Herbicide

Trooper™ 22K Active Ingredient: Picloram – 2 lb. / Gal.

Trooper™ P+D Active Ingredient: Picloram - 0.54 lb./Gal. + 2,4-D - 2 lb./Gal.

PROFILE

Trooper™ 22K and Trooper™ P+D provide selective broadleaf weed control in pastures, rangeland other non-crop areas without harming desirable grasses.

ADVANTAGE

Picloram controls a wide range of broadleaf weeds and brush including biennial and deep-rooted perennial weeds typically found in undisturbed soil situations. Picloram also provides soil residual for season-long weed control.

TROOPER™ 22K AND TROOPER™ P+D FEATURES AND BENEFITS

TROOPER™ 22K

- Preferred choice for many invasive and noxious weeds
- High picloram AI load per gallon
- Provides lasting weed control through soil residual
- Translocates throughout the plant for complete control to the roots
- Safe to most cool and warm season grasses
- No grazing restrictions, except for lactating dairy animals (See label for specific restrictions)

TROOPER™ P+D

- Excellent choice for broadleaf weed control in rangeland and pasture applications
- Convenient premix of picloram and 2,4-D
- Provides lasting weed control through soil residual
- Translocates throughout the plant for complete control to the roots
- Safe to most cool and warm season grasses
- No grazing restrictions, except for lactating dairy animals (See label for specific restrictions)

MODE OF ACTION

Picloram is a member of the pyridine family of herbicides which include Clopyralid and triclopyr. Picloram is a systemic herbicide that is rapidly absorbed by both foliage and roots. It is translocated throughout the plant via the phloem and accumulates in new growth where synthesis of nucleic acids and proteins are suppressed leading to plant death in a few days or weeks.

This information is not a substitute for the label. Always read and follow label directions carefully.

USES AND APPLICATIONS

	TROOPER™ 22K	TROOPER™ P+D
Active ingredients	Picloram – 2 lb./Gal.	Picloram - 0.54 lb./Gal. 2,4-D - 2 lb./Gal.
Restricted Use Product (RUP)	Yes	Yes
LABELED USES		
Rangeland & Permanent Grass pastures Conservation reserve Program (CRP)	X	X
Fallow Cropland	X	
Non-Crop – Forest Planting & Manufacturing Sites	X	
Rights-of-Way: Electrical Power Line, Communication Lines, Pipelines, Roadsides and Railroads	X	
Wildlife Openings in Forests and Non-Crop areas	X	
APPLICATION METHODS		
Broadcast Ground & Aerial	X	X
High Volume Foliar	X	X
Modified High Volume Leaf-Stem	X	
Spot Treatment, Soil Spot Concentrate, Broadcast Cut Stubble, Special Ground Equipment	X	

Approved Applicator Training -

Nufarm promotes the responsible use and ongoing stewardship of our products, and the critical technology that drives our business and that of our customers. Nufarm provides technical support and stewardship training to land managers, extension educators, as well as applicators involved with the use and application of picloram herbicides.

Every 2 years, beginning January 1, 2008, all registrants of picloram herbicide products are required to offer approved training to applicators covering application techniques and product stewardship particular to their use(s) of the registrants picloram based products.

For additional information and technical support for Nufarm picloram based herbicides please contact:
