

Tahoe[®] 3A

SELECTIVE HERBICIDE

TAHOE[®] 3A FOR OUTSTANDING CONTROL.

Tahoe[®] 3A is a water-soluble amine triclopyr formulation used to control woody plants, aquatic plants and annual and perennial broadleaf weeds. Tahoe 3A provides excellent weed control, eliminating most kinds of unwanted broadleaf and aquatic weeds and brush without harming desirable grasses. Its use-site flexibility makes Tahoe 3A ideal for virtually any vegetation management program. Because of its low phytotoxicity to grasses and low soil activity, Tahoe 3A is the perfect solution for treating vegetation near sensitive sites.

COMPETITIVE ADVANTAGES

- Controls more than 50 woody plant species plus many tough broadleaf and aquatic weeds
- Low phytotoxicity to grasses and low soil activity
- Rainfast in 2 hours
- Broad range of labeled use sites
