

## ENHANCED BROAD-SPECTRUM CONTROL OF TOUGH WEEDS.

Spitfire® provides true above-ground and below-ground burndown of broadleaf weeds, including all troublesome herbicide-resistant species. Fields treated with Spitfire will benefit from weed control that will ease planting and ensure optimum yields, all while managing the risk of herbicide-resistant weed populations.

### COMPETITIVE ADVANTAGES

#### ENHANCED BELOW-GROUND BURNDOWN

- Above-ground and below-ground burndown: kills resistant weeds, roots and all
- Dual auxin mode of action for synergistic control
- Optimized ratio for use closer to soybean planting
- Ester formulation for dependable cool-weather performance

### AT-A-GLANCE INFO

EPA REG. NO.	71368-109
ACTIVE INGR.	2,4-D ester (50.31%), dicamba acid (5.44%)
FORMULATION	liquid
CHEM. FAMILY	phenoxy-carboxylic acid, benzoic acid
GROUP NO.	4
MODE OF ACT.	synthetic auxin
REI	48 hours
SIGNAL WORD	caution
RESTRICTED	no
PACKAGE SIZE	2.5 gal container (2 per case), 265 gal tote, bulk

## ENHANCED BROAD-SPECTRUM CONTROL OF TOUGH WEEDS.

### KEY USES

Corn (preplant and pre-emergence)  
 Cotton (preplant)  
 Fallow systems (between crop applications)  
 Pasture  
 Sorghum  
 Soybean (preplant)  
 Wheat

### KEY WEEDS CONTROLLED

(See product label for complete list)

Buckwheat, wild  
 Buffalobur  
 Chickweed, common  
 Cockle, cow  
 Cocklebur, common  
 Croton, woolly  
 Dandelion  
 Devils-claw  
 Dogfennel  
 Evening primrose, cutleaf  
 Flax  
 Fleabane, annual  
 Hairy bittercress  
 Henbit  
 Knotweed, prostrate  
 Kochia  
 Lambsquarters, common  
 Lettuce, prickly  
 Mallow, common  
 Marestalk (horseweed)  
 Morningglory; ivyleaf, tall  
 Mustard species  
 Pennycress, field  
 Pigweed; prostrate, redroot, smooth, tumble  
 Purslane, common  
 Ragweed species  
 Shepherd's-purse  
 Smartweed, Pennsylvania  
 Sowthistle  
 Thistle, Russian  
 Velvetleaf

### USE SUMMARY

**CORN (PREPLANT AND PRE-EMERGENCE ONLY)** Limited to 1 application per crop cycle. Maximum of 2.5 pts/A per application.

**COTTON (PREPLANT ONLY)** Limited to 2 applications per year. Maximum of 2.0 pts/A per application.

**PASTURE AND RANGELAND (HAY AND SILAGE)** Maximum of 2 applications per year. Maximum of 10.4 pts/A per year.

**SORGHUM (POST-EMERGENCE)** Limited to 1 application per crop cycle. Maximum of 1.25 pts/A per application.

**SOYBEAN (PREPLANT ONLY)** Only one application of this product may be made per growing season under these directions (listed in chart) for preplant application to soybeans.

AMOUNT OF SPITFIRE/ACRE	MINIMUM WAITING INTERVAL BEFORE PLANTING SOYBEANS	DIRECTIONS
2.0 to 2.5 pints	30 days	Apply before planting soybeans to control actively growing emerged broadleaf weeds. Following application, a minimum accumulation of 1" rainfall or overhead irrigation followed by the specified minimum waiting interval is required before planting soybeans.
1.25 to 2.0 pints	15 days	Apply before planting soybeans to control actively growing emerged broadleaf weeds. Following application, a minimum accumulation of 1/2" rainfall or overhead irrigation followed by the specified minimum waiting interval is required before planting soybeans.
1.0 to 1.25 pints	7 days	Apply before planting soybeans to control actively growing emerged broadleaf weeds. Following application, a minimum accumulation of 1/2" rainfall or overhead irrigation followed by the specified minimum waiting interval is required before planting soybeans.

### WHEAT

**PRE-EMERGENCE:** Maximum of 3.25 pts/A per application.

**PREHARVEST:** Maximum of 1.2 pts/A per application.

Limited to 1 post-emergence application per crop cycle.

See product label for complete directions for use.

### PROVEN PERFORMANCE

University research shows Spitfire® outperforms Sharpen® on tough weeds

#### 2013 HERBICIDE TRIAL // TENNESSEE // MARESTAIL

#### 2013 HERBICIDE TRIAL // ARKANSAS // CUTLEAF EVENING PRIMROSE
