

# WeedMaster®

HERBICIDE

## DEPEND ON WEEDMASTER®.

For years, growers and ranchers have counted on WeedMaster® for consistent weed control in sugarcane, pastures, small grains and fallowland. WeedMaster is a selective, post-emerge herbicide that provides tough, long-lasting control of a broad spectrum of annual, biennial and perennial broadleaf weeds. The growth regulating effects of 2,4-D and dicamba interfere with the normal development of weeds, ultimately causing plant death.

### COMPETITIVE ADVANTAGES

#### CONSISTENT CONTROL IN A CONCENTRATED FORMULA

- Achieve outstanding control of brush and broadleaf weeds in a concentrated formula
- Controls tough weeds such as horsenettle, thistles and blackberry
- Safe for desirable grasses
- Pre-emergence control with residual activity

### AT-A-GLANCE INFO

EPA REG. NO.	71368-34
ACTIVE INGR.	DMA dicamba salt (12.4%), 2,4-D amine salt (35.7%)
FORMULATION	liquid
CHEM. FAMILY	benzoic acid, phenoxyacetic acid
HRAC NO.	4
MODE OF ACT	auxin growth regulator
REI	48 hours
SIGNAL WORD	danger
RESTRICTED	no
PACKAGE SIZE	1 gal container (5 per case), 2.5 gal container (2 per case), 30 gal drum, 265 gal tote, bulk

## DEPEND ON WEEDMASTER®.

### KEY USES

Conservation Reserve Program (CRP) land  
Fallowland  
General farmstead  
Sorghum  
Grass (hay or silage)  
Pasture  
Rangeland  
Sugarcane  
Wheat

### KEY WEEDS CONTROLLED

(See product label for complete list)

#### ANNUALS

Buckwheat, wild  
Burdock  
Buttercup  
Cockle, cow  
Cocklebur,  
common  
Dogfennel  
Evening primrose  
Fleabane, annual  
Flixweed  
Knotweed  
Kochia  
Lambsquarters,  
common  
Marestail  
(horseweed)  
Morningglory;  
ivyleaf, tall  
Mustards; annual,  
tansy  
Pigweed;  
prostrate, redroot,  
smooth, tumble  
Purslane, common  
Ragweed; common,  
lanceleaf, western  
Sowthistle  
Shepherd's-purse  
Smartweed,  
Pennsylvania  
Sneezeweed, bitter  
Thistle, Russian  
Velvetleaf

#### BIENNIALS &

#### PERENNIALS

Bindweed, field  
Bittercress  
Chicory  
Dandelion,  
common  
Dock, curly  
Goldenrod, Missouri  
Groundsel, Texas  
Honeysuckle, hairy  
Horsenettle,  
Carolina  
Ivy, poison  
Marshelder  
Mesquite  
Persimmon, eastern  
Prickly lettuce  
Smartweed  
Sorrel, red  
Thistle, bull  
Vetch, hairy

### USE SUMMARY

**RATES:** 0.5 pts per acre to 4 to 5 pts/A for control of annual, biennial and perennial weeds. See label for per acre rate according to weed growth stage.

Apply to actively growing weeds as aerial, broadcast, band, or spot spray applications.

Apply with water or sprayable fluid fertilizer as a carrier. Sprayable fluid fertilizer may be used as the carrier in preplant or pre-emergence uses. Post-emergence uses with sprayable fluid fertilizer may be made only on pasture, hayland, or wheat crops.

Surfactants and/or low use rate liquid fertilizers (28-0-0, 32-0-0) or crop oil concentrate may be used with this product to improve burndown of emerged weeds. (Do not use crop oil concentrate for feed crops – refer to crop oil concentrate label for complete directions.)

**AERIAL APPLICATION:** Use 3 to 10 gals of water/A.

**GROUND APPLICATION (BROADCAST):** Use 5 to 40 gals per broadcast acre.

See label for complete directions for use.
