

Nufarm

# Imazuron™

NON-SELECTIVE HERBICIDE

## ENSURE BARE GROUNDS STAY BARE.

With just one application of Nufarm Imazuron™, gravel yards and other intentionally bare areas are rid of 150 annual and perennial grasses, broadleaf weeds and vines. The residual control of Imazuron ensures that new weeds don't creep up and the dispersible granule formulation prevents nozzles and injection units from clogging. Plus, Imazuron makes an excellent tank-mix partner with other Nufarm products to broaden the spectrum of control.

### COMPETITIVE ADVANTAGES

- Provides knock down and long-term control of a wide range of broadleaf weeds, vines, hardwoods, and grasses
- Excellent long-term control of grasses such as broadleaf signalgrass, johnsongrass and sand dropseed
- Season-long bareground control
- Unique dispersible granule formulation won't clog nozzles or injection units ensuring easy application and even product distribution

### AT-A-GLANCE INFO

EPA REG. NO	228-654
ACTIVE INGR.	imazapyr (7.78%), diuron (62.22%)
FORMULATION	water-dispersible granule
CHEM. FAMILY	imidazolinone, substituted urea
GROUP NO.	2 and 7
MODE OF ACT.	AHAS-inhibitor and photosynthesis-inhibitor
SIGNAL WORD	caution
RESTRICTED	no
PACKAGE SIZE	10 lb (4 per case)

also controls 30+  
species of brush

**BROADLEAF WEEDS**

Dogfennel  
Goldenrod  
Horseweed  
Kochia  
Lambsquarters  
Pigweed  
Puncturevine  
Ragweed  
Russian thistle  
Shepherd's-  
purse  
Velvetleaf

**USE SUMMARY****APPLICATION RATES**

Mix Nufarm Imazuron™ in water and apply using properly calibrated equipment to deliver a uniformly distributed spray pattern. Apply this product at 7–19 lbs of product per acre, although rates as low as 5 lbs per acre may be used only if tank mixed with another herbicide. For retreatment purposes within the same growing season, apply a rate of less than 7lbs per acre.

Less than 15 inches rainfall: 7–10 lbs/A

15 to 35 inches rainfall: 8–13 lbs/A

Over 35 inches rainfall: 13–19 lbs/A

See product label for complete directions for use.
