

COTTON

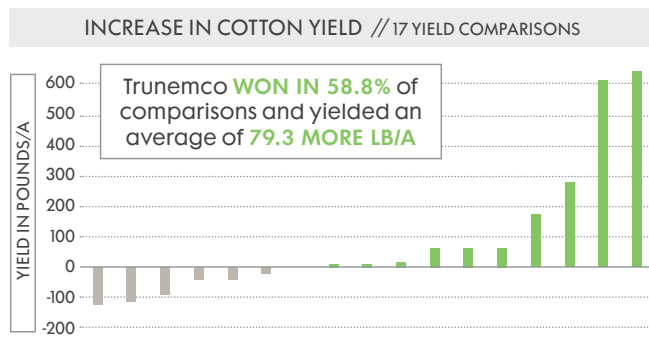

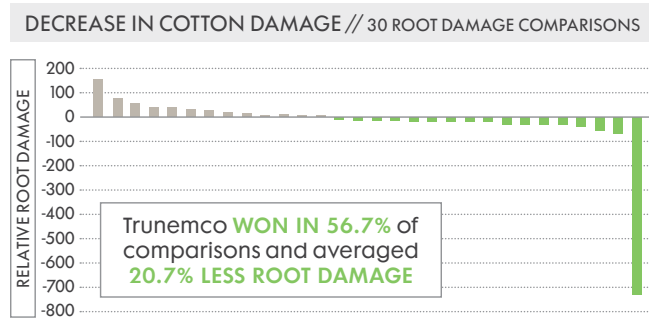

SUPERIOR NEMATODE PROTECTION, INCREASED YIELD.

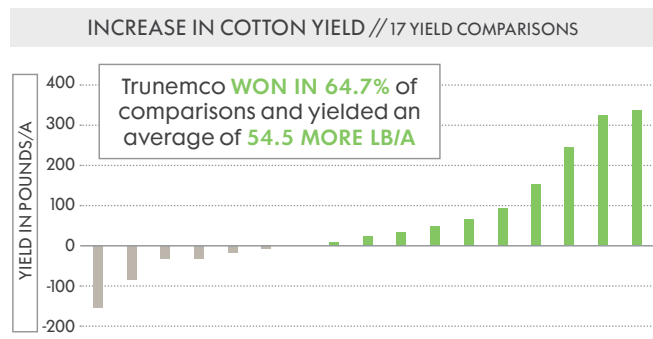

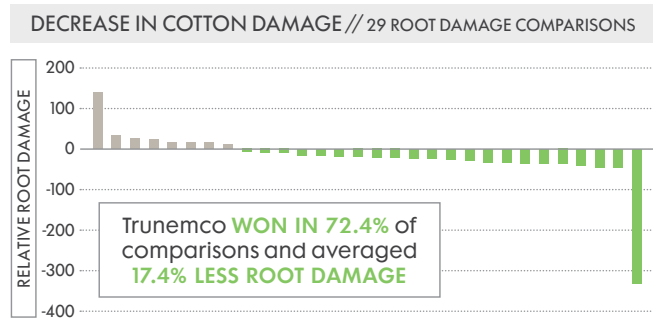

START WITH TRUE NEMATODE CONFIDENCE

Trunemco™ is a new nematode seed treatment solution that helps cotton thrive. This patented technology primes plant physiology, activating its natural defense system for superior broad-spectrum protection against nematode feeding and establishment. As an added assist, Trunemco microbial protection acts as an external barrier. This dual defense provides a leading level of protection delivering higher yields — the kind that can make a true bottom-line difference.

TRUNEMCO™ VS AVICTA®

TRUNEMCO™ VS PONCHO® VOTIVO®

LEADING PROTECTION

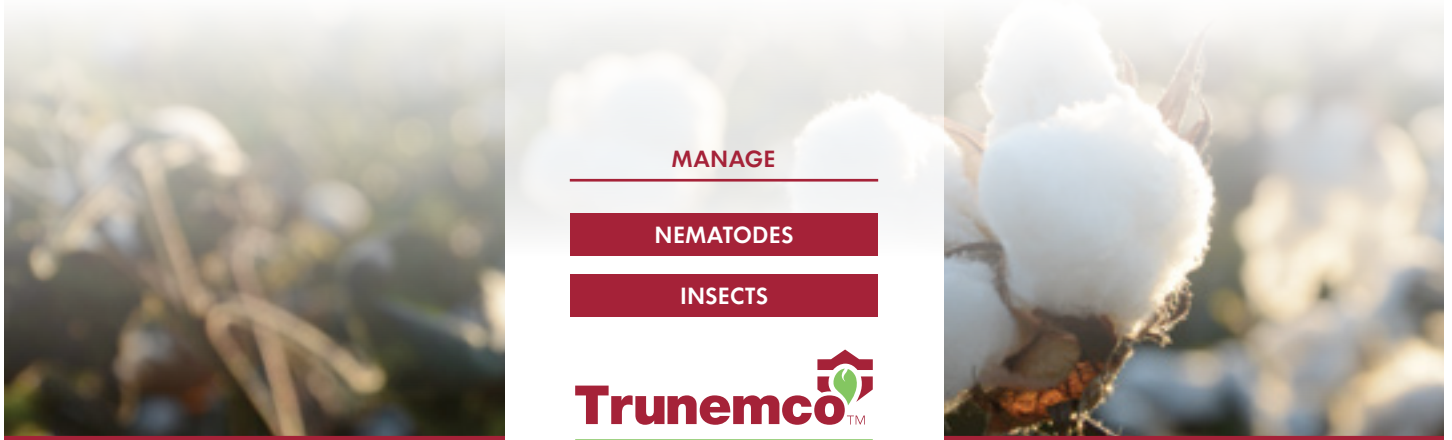

Cotton treated with a seed-applied fungicide and insecticide without (Check) or with a nematocide, grown in RKN infested soil.

COTTON

SUPERIOR NEMATODE PROTECTION, INCREASED YIELD.

NEMATODE DUAL-DEFENSE

- Primes plant physiology activating natural nematode barriers that optimize defense
- Two AIs offer dual defense, inside and out, against nematode feeding and establishment
- Leading level of protection allows plants to thrive delivering higher yields
- Protects against: root knot, Columbia lance and reniform nematodes

INSECTICIDE

- Protection against thrips and aphids
