

Credit® 5.4 Extra

NON-SELECTIVE HERBICIDE

START CLEAN + TREAT MORE ACRES WITH THIS CONCENTRATED FORMULA.

Delivering the performance you expect from the Credit® brand family, this concentrated formula treats more acres per jug. Credit 5.4 Extra is formulated with 4 pounds acid equivalent of glyphosate per gallon and a full load of quality surfactant – thus no additional surfactant is required.

COMPETITIVE ADVANTAGES

- Superior broad-spectrum control of tough annual and perennial broadleaf weeds and grasses
- Works fast – brown down of annuals in 2 to 3 days and perennials in 7 to 10 days
- Fully loaded – requires no additional surfactant
- Excellent crop safety
- Flexible labeling for use across multiple cropping systems and sites, including Roundup Ready® and other glyphosate tolerant crops
- Concentrated formula treats more acres per gallon

AT-A-GLANCE INFO

EPA REG. NO.	71368-126
ACTIVE INGR.	glyphosate, isopropylamine salt 53.8% (equivalent to 4 lbs/gal of acid glyphosate)
FORMULATION	liquid
CHEM. FAMILY	glycine
GROUP NO.	9
MODE OF ACT.	amino acid synthesis inhibitor
REI	4 hours
SIGNAL WORD	caution
RESTRICTED	no
PACKAGE SIZE	2.5 gal container (2 per case), 30 gal drum, 265 gal tote

KEY USES

Burndown applications in reduced tillage and fallow systems
Non-crop agricultural sites including farm ditches, CRP and dormant rangeland
Non-crop and industrial sites including forestry, pasture, rangeland, railroad and utility rights-of-ways
Roundup Ready[®] and other glyphosate tolerant crops including corn, cotton, soybeans and sugarbeets

KEY WEEDS CONTROLLED

(See product label for complete list)
Many annual and perennial weeds and woody brush

USE SUMMARY

GENERAL USE RATES

Apply at 12 to 36 oz/A for control of annual weeds. See label for specific application details and tank-mix options for the target weed, crop, timing to the crop and total rate limits.

Apply to actively growing grass and broadleaf weeds. If weeds have been mowed or tilled, do not treat until plants have resumed active growth and have reached the recommended stages.

Allow at least 3 days after treatment before tillage.

For maximum agronomic benefit, apply when weeds are 6 inches or less in height.

To prevent seed production, applications should be made prior to seedhead formation.

This product does not provide residual control; therefore, delay application until maximum weed emergence. Repeat treatments or tank mixtures with residual herbicides may be necessary to control later germinating weeds.

See product label for complete directions for use.
