

# EASE SPRING WEED PRESSURE WITH AN EFFECTIVE BURNDOWN PROGRAM.

Last year's wet spring and late harvest reduced opportunities for critical herbicide applications, leading to the hidden threat of a bulging weed seed bank, and the potential for major weed emergence this spring. It's time to put the challenges of 2019 behind us and focus on success for the new season. Healthy crops start with clean fields free of weed competition. Nufarm is here to help with effective spring burndown recommendations that tackle tough weeds and complementary solutions to help you grow better in 2020.

## TACKLE TOUGH WEEDS, HERE ARE TOP PERFORMERS TO CONSIDER:

BURNDOWN PROGRAMS									
NUFARM BRAND	KOCHIA (GLY/ALS-RES)	RUSSIAN THISTLE (ALS-RES)	TANSY MUSTARD	PRICKLY LETTUCE (ALS-RES)	CANADA THISTLE	WILD BUCKWHEAT	BINDWEED	LAMBS- QUARTER	PIGWEEED (GLY-RES)

## SPRING BURNDOWN PROGRAM RECOMMENDATIONS

**PREPLANT BURNDOWN** BURNMASTER™ (1-2 pts/A) OR SCORCH® (1-2 pts/A)

**BURNDOWN + RESIDUAL** BURNMASTER™ (1.5 pts/A) OR SCORCH® (1.5 pts/A) + PANTHER® SC (3 oz/A)

**BURNMASTER™:** Unique ester formulation offers excellent tank mix compatibility and performs well in cold weather conditions. Contains 1 lb dicamba acid + 3.07 lb 2,4-D ester per gallon.

**SCORCH®:** Designed with glyphosate-resistant and dicamba-tolerant kochia in mind. Three active ingredients to knock down kochia plus more than 60 annual and 50 biennial/perennial weeds – including resistant varieties.

**PANTHER® SC:** Liquid flumioxazin for ease of handling. Excellent cropping flexibility with effective residual on many key broadleaf weeds.

**CREDIT® XTREME:** The only glyphosate with Dual-Salt Technology™ for faster uptake and rainfastness. Include Credit Xtreme in your tank mix when extra grass control is needed.

## TAKE CONTROL: KOCHIA SPOTLIGHT

### 3 THINGS TO KNOW

1. Kochia is an annual weed that emerges in late February into early summer
2. A single kochia plant may produce 30,000 seeds, spreading them through tumbleweed-like behavior
3. Kochia is overcoming many herbicide classes, known resistance includes groups 2, 4, 5, 7 and 9

### PICK THE RIGHT PROGRAM

BURNDOWN // KOCHIA AND RUSSIAN THISTLE

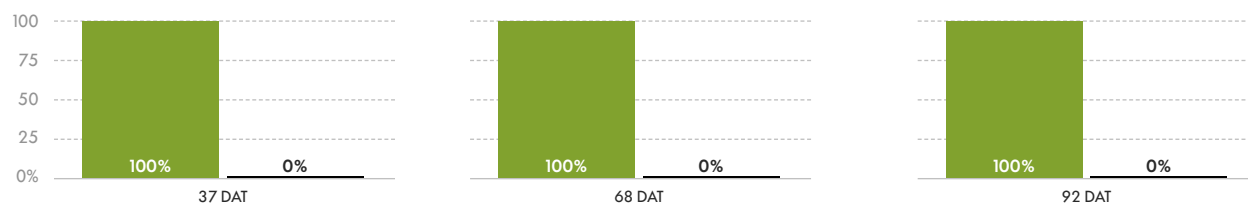

BURNDOWN + RESIDUAL // KOCHIA

### SCORCH CONTROLS RESISTANT KOCHIA

Scorch works through true systemic control to knock down more than 100 broadleaf weeds and is formulated specifically for challenging kochia control. Scorch combines three powerful actives to better handle variable weather conditions – delivering effective weed control and crop safety, even in cool temperatures.

#### 100% KOCHIA CONTROL, 0% CROP INJURY

Colorado, 2015 / winter wheat / Scorch (0.5 to 1 pt/A) / over-the-top application
