● YES ● NO

Adjuvants are recommended for many of these programs. Consult with your crop protection retailer for specific recommendations.

## Panther® SC

### KEY PERFORMANCE BENEFITS

- Controls a broad spectrum of annual broadleaf and grass weeds, including most broadleaf weeds resistant to glyphosate
- Offers long-lasting residual control
- Flexible rotation options
- Enhanced speed of control on a broader weed spectrum in labeled burndown programs

## Spitfire®

### KEY PERFORMANCE BENEFITS

- Below-ground burndown: kills resistant weeds, roots and all
- Dual auxin mode of action for synergistic control
- Optimized ratio for use closer to soybean planting
- Ester formulation for dependable cool-weather performance
- Labeled for 7-day preplant interval in soybeans

## Credit® Xtreme

### KEY PERFORMANCE BENEFITS

- Proprietary Dual-Salt Technology™ delivers excellent crop safety
- Takes on the toughest weeds with quick burndown and complete control
- Excellent tank-mix compatibility, even in hard water environments
- Fast translocation activity and rainfastness
