Diquat 2L

NON-SELECTIVE HERBICIDE

A BETTER CHOICE FOR A CLEANER HARVEST.

Nufarm Diquat 2L herbicide provides desiccation of green plant material on contact, enabling faster, cleaner, more efficient harvest. Diquat 2L may also be applied as a general herbicide to control broadleaf weeds and grasses in non-bearing crops and non-crop areas. The product can be used for site preparation in a number of tree, vine, small fruit and vegetable crops before planting.

COMPETITIVE ADVANTAGES

- Quick desiccation — fast-acting, non-selective, foliar-applied, plant desiccant and plant herbicide allows growers to plan harvest timing
- Rainfast 30 minutes after application
- Water-soluble formulation makes mixing simple
- No specialized equipment required — can be applied using conventional ground or aerial sprayers
- No harmful soil residues
- Use with an adjuvant

AT-A-GLANCE INFO

EPA REG. NO	228-675
ACTIVE INGR.	diquat dibromide (37.3%)
FORMULATION	liquid
CHEM. FAMILY	bipyridylum
GROUP NO.	22
MODE OF ACT.	cell membrane disruptor
REI	24 hours
SIGNAL WORD	caution
RESTRICTED	no
PACKAGE SIZE	2.5 gal (2 per case), 250 gal tote

Diquat 2L

A BETTER CHOICE FOR A CLEANER HARVEST.

KEY USES

Alfalfa, clover (preharvest desiccation)
Canola (preharvest desiccation)
Potatoes (preharvest desiccation)
Tree, vine, small fruit and vegetable crops (non-bearing) for site preparation prior to planting and for vegetation control up to one year of harvest
Non-crop or non-planted areas on farms (vegetation control)

KEY WEEDS CONTROLLED

(See product label for complete list)
Any foliage contacted by Diquat 2L herbicide will be killed

USE SUMMARY

Always add a nonionic surfactant or an alternative adjuvant that meets label specifications.

Do not apply to weeds growing under stress.

Do not apply to large or mowed weeds.

Weeds that are established or larger than 6" may require retreatment. Additionally, weeds that emerge after application of Nufarm Diquat 2L herbicide will not be controlled or suppressed.

Do not apply this product through any type of irrigation system.

Take caution to avoid drift onto desirable crops and vegetation.

Conditions such as cool temperatures (below 55° F) or cloudy, overcast weather will slow Nufarm Diquat 2L herbicide activity but will not affect performance.

See product label for complete directions for use.
