

Relegate®

SELECTIVE HERBICIDE

SOLUTION FOR BRUSH CONTROL IN PASTURES AND RANGELAND.

Keeping brush and weeds from pastures and rangeland can be an expensive and time-consuming proposition. Relegate® herbicide from Nufarm can form the cornerstone of an integrated brush control plan. Relegate offers ranchers and producers flexible, long-lasting brush control specifically designed for range and pastures. With excellent safety to grasses, Relegate offers control of more than 60 woody plant species, plus many tough broadleaf weeds, ultimately leading to healthier pastures.

COMPETITIVE ADVANTAGES

- Controls more than 60 woody plant species plus many tough broadleaf weeds without harming desirable grasses
- May be applied to woody or herbaceous broadleaf plants as a foliar spray or as a basal bark or cut stump treatment to woody plants
- Compatible with numerous other broadleaf active ingredients
- May be tank-mixed with liquid nitrogen fertilizer and foliar applied

AT-A-GLANCE INFO

EPA REG. NO.	228-521
ACTIVE INGR.	triclopyr (61.6%)
FORMULATION	liquid
CHEM. FAMILY	pyridine
HRAC NO.	4
MODE OF ACT.	synthetic auxin growth regulator
REI	12 hours
SIGNAL WORD	caution
RESTRICTED	no
PACKAGE SIZE	2.5 gal container (2 per case)

Dandelion
Dogfennel
Field bindweed
Ground ivy
Lambsquarters
Lespedeza
Matchweed
Mustard
Oxalis
Plantain
Purple loosestrife
Ragweed
Smartweed
Vetch
Wild violet

USE SUMMARY

RATES AND TIMING

Apply this product at rates of 1 to 6 quarts per acre for the control of broadleaf weeds and woody plants. Apply in enough water to provide uniform and complete coverage. For best results, make applications when woody plants and weeds are actively growing. Use higher rates when brush averages 15 feet or more in height or when brush covers more than 60 percent of the area to be treated.

See product label for complete directions for use.

APPLICATION RESTRICTIONS

FOR FOLIAR BROADCAST SPRAYS

Beef cattle: No grazing restrictions if applications are 2 quarts per acre or less or if less than 25 percent of a grazed area is treated.

See product label for additional grazing restrictions and for intervals for dairy animals. Consult product label for haying intervals.

SLAUGHTER RESTRICTIONS

Withdraw livestock from grazing treated grass or consumption of treated hay at least three days before slaughter.

See product label for complete directions for use.
