

# Truslate<sup>®</sup> Pro

SELECTIVE HERBICIDE

## TRU PERFORMANCE AND VALUE FROM TRUSLATE<sup>®</sup> PRO.

Count on Truslate<sup>®</sup> Pro, a truly new broadleaf herbicide for cereals including barley and all types of wheat. With its combination of three active ingredients in a convenient premix, Truslate Pro offers unparalleled control of broadleaf weeds – including kochia, wild buckwheat, Canada thistle, wild mustard, pigweed and lambsquarters – with excellent crop safety and outstanding tank-mix compatibility. And since it's from Nufarm, it also delivers outstanding value.

### COMPETITIVE ADVANTAGES

- Outstanding performance on tough broadleaf weeds including kochia, wild mustard, pigweed and lambsquarters
- Convenient premix of three active ingredients
- Developed to be tank-mix compatible with popular grass herbicides
- Excellent crop safety

### AT-A-GLANCE INFO

<b>EPA REG. NO.</b>	71368-88
<b>ACTIVE INGR.</b>	MCPA (30.73%), fluroxypyr (10.37%), clopyralid (5.6%)
<b>FORMULATION</b>	emulsifiable concentrate
<b>CHEM. FAMILY</b>	phenoxy, carboxylic acid, pyridine
<b>HRAC NO.</b>	4
<b>MODE OF ACT.</b>	synthetic auxins
<b>REI</b>	12 hours
<b>SIGNAL WORD</b>	warning
<b>RESTRICTED</b>	no
<b>PACKAGE SIZE</b>	2.5 gal (2 per case), 265 gal tote

### KEY USES

Barley  
Oats  
Wheat

### KEY WEEDS CONTROLLED

(See product label for complete list)

Alfalfa, volunteer (from seed)	Mustard; tumble, wild
Artichoke, Jerusalem	Nightshade; black, cutleaf, eastern black, hairy
Buckwheat, wild	
Buffalobur	Pennycress, field
Canola, volunteer	Pigweed, redroot
Chamomile, false	Pineappleweed
Chamomile, mayweed	Puncturevine
Chickweed	Purslane, common
Clover; black medic, hop, red, sweet, white	Ragweed; common, giant
Cocklebur, common	Salsify, meadow
Cornflower	Shepherd's-purse
Dock, curly	Smartweed; green, Pennsylvania
Flax, volunteer	Sowthistle, annual
Flixweed	Starthistle, yellow
Hawksbeard, narrowleaf	Sunflower
Hawkweed; orange, yellow	Tansymustard, pinnate
Hemp dogbane	Teasel, common
Horseweed, field	Thistle; bull, Canada, musk, Russian
Jimsonweed	Velvetleaf
Kochia	Vetch
Ladysthumb	
Lambsquarters, common	
Lettuce, prickly	
Mallow; common, Venice	
Marshelder	
Morningglory	

### USE SUMMARY

Apply as a post-emergence broadcast treatment to actively growing wheat, barley or oats from the 3-leaf stage up to and including flag leaf emergence. Make applications to actively growing weeds that are 4 inches tall or vining. For perennial weeds (such as Canada thistle), apply when the majority of the basal leaves have emerged from the soil up to bud stage to obtain season-long control.

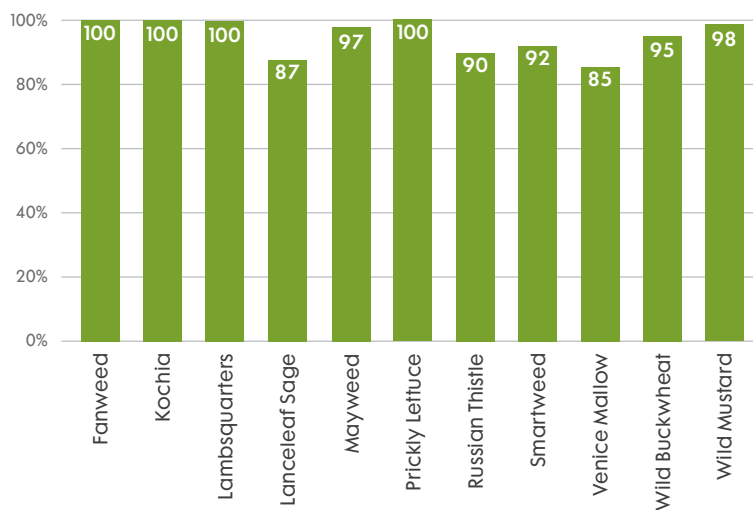

See label for complete directions for use.

### BROADCAST APPLICATION RATES

For young, succulent growth of susceptible weed species less than 4 inches tall, apply 1 to 1.5 pts/A. Best control of kochia is achieved when kochia is at least 1 inch tall and not taller than 4 inches. For dicamba resistant kochia and volunteer potatoes, use 1.5 to 2 pts/A. Tank-mixes with additional herbicides may be necessary when controlling less sensitive species, some perennials, and under conditions where control is more difficult (plant stress conditions such as drought or extreme temperatures, dense weed stands and/or larger weeds).

### WEED CONTROL PERCENTAGES WITH TRUSLATE® PRO

Treatments applied at label rates. H2008001 North Dakota State University, H2008004 Montana State University, H2008002 Independent Research

See label for complete directions for use.
