

# Range & Pasture Solutions Spotlight

## TWO NEW STANDOUTS

### WeedMaster® XHL

An innovative premix built on decades of proven results, WeedMaster® XHL uses Nufarm-exclusive 2,4-D Dual Salt Technology™ and DGA dicamba to treat 20% more acres with every gallon versus traditional WeedMaster while controlling 90+ types of weeds and brush. This convenient solution delivers superior selective range and pasture management with low odor, reduced volatility and excellent tank-mix compatibility.

[dual salt 2,4-D: DMA 35.47%, MMA 8.4%+ DGA dicamba 18.11%]

Lower volatility and odor than traditional dicamba and 2,4-D solutions

Controls 90+ types of annual and perennial weeds and brush

Excellent tank mixing compatibility with a range of partner products

#### Conversion Quick Reference

**LOW RATE:**  
1.6 pt/A of WeedMaster XHL equals 2.0 pt/A of WeedMaster

**HIGH RATE:**  
3.2 pt/A of WeedMaster XHL equals 4.0 pt/A of WeedMaster

#### WeedMaster XHL

High Load  
2,4-D + Dicamba

**20%**  
more acres treated

### Purestand® MAX

With a unique combination of two powerful active ingredients, Purestand® Max is a selective post-emergent herbicide designed specifically for Bermudagrass pastures. Labeled to control or suppress more than 80 species of grasses and broadleaf weeds, including Johnsongrass, nutsedge and thistles. It's an ideal pasture weed management solution because it does not damage Bermudagrass. Add to this a "zero day" grazing restriction and you have a near-perfect tool to fight noxious and nuisance pasture weeds. [metsulfuron 15.0% + sulfosulfuron 60%]

Proven safety to established Bermudagrass

80+ species of grass and broadleaf weeds

No grazing restrictions

#### Conveniently Packaged

One container treats 12-16 acres, depending on use rate.  
16-OZ BOTTLE, 12 PER CASE

## TOOLS FOR TARGETED WEED CHALLENGES

### Clean Slate®

*clopyralid amine (40.9%)*

Manage more difficult pasture weeds, invasive perennials and rangeland brush from Canada thistle and knapweeds to locust and mesquite.

*No grazing restrictions.*

### Patriot®

*metsulfuron methyl (60%)*

Wide application window adds flexibility to gain control of tough broadleaf weeds and woody plants such as lespedeza, blackberry and dewberry.

### Relegate®

*triclopyr ester salt (61.6%)*

Versatile, long-lasting brush control via foliar spray, basal bark or cut stump methods. Effective on oak, mulberry, sweetgum, elm and wax myrtle.
