FAST KNOCKDOWN IN A LASTING FOLIAR SPRAY.

Mallet® 2F T&O offers quick knockdown, residual control, low use rates and an easy-mixing formulation. Low use rates mean you’ll have less product to handle. Best of all, since Mallet 2F offers both fast activity and lasting residual, you’ll benefit from reduced application frequency.

COMPETITIVE ADVANTAGES

EFFECTIVE AND LASTING PEST CONTROL
- Controls a broad spectrum of key insects
- Quick knockdown
- Long-lasting residual control; up to 12 weeks as a drench application and 3-4 weeks as a spray application
- Higher use rates for large trees
- Labeled for multiple markets
- Controls Emerald Ash Borer

AT-A-GLANCE INFO

EPA REG. NO. 228-695
ACTIVE INGR. imidacloprid (21.4%)
FORMULATION liquid

# FAST KNOCKDOWN IN A LASTING FOLIAR SPRAY.

## KEY USES

- Fruit and nut trees
- Interior plantscapes
- Shrubs and ornamental plants in landscape, nursery and interiorscapes
- Turfgrass (including golf courses and sod farms)

## USE SUMMARY

### LANDSCAPE ORNAMENTALS

Ornamental trees, shrubs, evergreens, flowers, foliar pants, groundcovers and interior plantscapes in and around the perimeter of commercial and residential landscapes.

Apply by foliar or soil applications, including soil injection, drenches and broadcast sprays. Foliar applications offer locally systemic activity against insect pests.

- **Foliar rates:** 1.7 fl oz (50 mL) per 100 gal of water
- **Broadcast rates:** 0.46 – 0.6 per 1,000 sq ft

### TURFGRASS

Turfgrass in home lawns, business and office complexes, shopping complexes, multi-family residential complexes, golf courses, airports, cemeteries, parks, playgrounds, athletic fields and sod farms.

Apply product in sufficient water to provide adequate distribution in treated area. Use equipment which will produce a uniform, coarse droplet spray, using a low pressure setting to eliminate off target drift.

- **Rate:** 1.25 – 1.6 pt per acre (0.46 to 0.6 fl oz per 1,000 sq ft)

### GRASSY AREAS IN NURSERIES

Nursery grass in sites such as under or around field or container grown plants, on roadways or other grassy areas in or around nurseries.

- **Rate:** 19.2 – 25.6 fl oz per acre (0.46 – 0.6 fl oz per 1,000 sq ft)

See product label for complete directions for use.

## KEY INSECTS CONTROLLED

(See product label for complete list)

- Aphids
- Billbugs
- Black turfgrass ataenius
- Emerald ash borers
- Flatheaded borers
- Green June beetles
- Japanese beetles
- Leafminers
- Mealybugs
- Mole crickets
- Oriental beetles
- Sawfly larvae
- Soft scales
- Southern masked chafers
- Weevils
- White grub larvae
