

3336[®] F

FUNGICIDE

POWERFUL CONTROL IN A FLOWABLE FORMULA.

3336[®] F is a water-based broad-spectrum systemic fungicide with preventive and curative properties. Its unique formulation is compatible with drench or spray applications over a wide range of ornamental settings.

COMPETITIVE ADVANTAGES

THE STANDARD IN DISEASE PROTECTION

- Easy-to-use formulation
- Full chemigation label
- Broad-spectrum disease control
- Tank-mix compatible with most commonly used pesticides

AT-A-GLANCE INFO

EPA REG. NO.	1001-69
ACTIVE INGR.	thiophanate-methyl (41.25%)
FORMULATION	flowable
CHEM. FAMILY	thiophanates
FRAC NO.	1
REI	12 hours
PACKAGE SIZE	1 qt (12 per case), 2.5 gal (2 per case)
APPLICATION	spray, drench, dip

-  FIELD-GROWN NURSERY

3336[®]F

POWERFUL CONTROL IN A FLOWABLE FORMULA.

KEY USES

Annual and perennial flowers
Bedding plants
Deciduous and evergreen trees
and shrubs
Foliage plants
Groundcovers

KEY DISEASES CONTROLLED

(See product label for complete list)

Anthracnose
Black root rot
Black spot of rose
Brown rot and blight
Bulb, corm, and rhizome rots
Fusicladium and venturia leaf scabs
Leaf spots and blights
Ovulinia blight
Plant and cutting diseases
Powdery mildew
Rust diseases
Stem, crown, and root rot
Tip blight of pine
Twig blights, cankers, and dieback

USE SUMMARY

3336[®]F is a broad-spectrum systemic fungicide which controls a variety of foliar, stem, and root diseases on a wide range of commercially important plants.

SOIL DRENCH APPLICATION: Best crop protection is achieved with preventive treatments repeated every 21-28 days. Do not exceed 300 pounds active ingredient per acre per crop season from all thiophanate-methyl containing products.

FOLIAR APPLICATION: Begin treatments when disease first appears, or during suspected periods of disease incidence. Apply additional applications every 7-14 days or as otherwise instructed for the prevention or control of the listed diseases. Do not exceed 36 pounds active ingredient per acre per crop season from all thiophanate-methyl containing products.

RATES: Maximum Individual Application Rates

Foliar Application	8-24 fl oz/100 gal
Soil Drench Application.....	8-16 fl oz/100 gal
Plant Dip Application	16-24 fl oz/100 gal

See product label for complete directions for use.

RESISTANCE MANAGEMENT

To avoid the development of tolerant strains of fungi, 3336 F should be used with fungicides of different modes of action. Consult your local Nufarm representative for proper disease identification and advice on the prompt use of some other suitable fungicide or disease control strategy.
