

Q. WHAT IS TRACTION™?

A. Traction is a proven fungicide that helps golf course managers save time and stay in control of challenging turf diseases, including anthracnose, dollar spot, brown patch and snow mold.

Q. WHAT MAKES TRACTION UNIQUE?

A. Traction is a unique pre-mix formulation of fluazinam and tebuconazole, two industry leading active ingredients that provide both contact and systemic plant activity and multiple modes of action for broad spectrum control and disease resistance management.

Q. WHAT IS TRACTION'S DISEASE CONTROL SPECTRUM?

A. Traction has been university tested and shown effective on a wide range of spring, summer, fall and winter diseases, such as Waitea patch, dollar spot, brown patch, basal and foliar anthracnose, gray leaf spot and snow molds.

Q. WHERE CAN TRACTION BE USED?

A. Traction is labeled for use to control diseases of both cool- and warm-season grasses on golf courses only, including greens, tees, fairways, aprons and rough.

Q. WHAT ARE THE APPLICATION INSTRUCTIONS FOR TRACTION?

A. Always read and follow label directions for use rates and mixing. Apply in sufficient water to ensure thorough coverage. Apply in a minimum spray volume of 40 gal of water per acre. For spray drift management, do not apply when wind velocity exceeds 15 mph.

Q. ARE THERE ANNUAL LIMITATIONS ON THE AMOUNT OF PRODUCT OR NUMBER OF APPLICATIONS THAT CAN BE MADE?

A. Yes. Do not apply more than six (6) applications at 1.3 fl oz/1,000 sq ft (57 fl oz/A) per year. Do not exceed 7.8 fl oz/1,000 sq ft (2.65 gal/A) of this product per acre per year.

Q. ARE THESE LIMITATIONS THE SAME FOR NEW YORK?

A. No. Do not exceed 3.9 fl oz of this product per 1,000 sq ft (1.33 gal/A) (2.2 lb ai/A tebuconazole) per year in the state of New York.

Q. CAN TRACTION BE TANK-MIXED WITH OTHER CONTROL PRODUCTS?

A. Yes. Lab and field experience has shown that Traction is physically compatible with many commonly used golf products including fungicides, herbicides, insecticides and plant growth regulators. However, a jar test is always recommended before large scale use at an individual site based on water quality and desired tank-mix components.

Q. CAN TRACTION BE USED AS PART OF A RESISTANCE MANAGEMENT ROTATION?

A. Yes. Because of Traction's unique formulation containing two different mode of action groups and two different plant location strategies, Traction is very effective for use in fungicide resistance management programs. Regular use in a rotational program or as a tank-mix partner may prevent or delay the development of disease resistant populations at your location.

Q. IS TRACTION SAFE TO USE ON BOTH COOL- AND WARM-SEASON TURF?

A. Yes. Numerous university trials and cooperator experiences have shown a very high degree of turf safety during use throughout the growing season and winter dormancy.

Q. WHAT IS THE APPLICATION RATE FOR TRACTION ON VARIOUS DISEASES?

A. For all labeled diseases and algal scum, Traction is applied at a single rate of 1.3 fl oz/1,000 sq ft (57 fl oz /A).

Q. WHAT SPRAY INTERVALS ARE RECOMMENDED?

A. Reapply at a minimum of 14 days after application for the control of most diseases. Always read and follow the complete label instructions.

Q. WHAT ABOUT IRRIGATION OR RAINFALL AFTER APPLICATION OF TRACTION?

A. Allow sprayed area to completely dry before an irrigation or rainfall event.

Q. WHAT MOWING DIRECTIONS ARE RECOMMENDED WITH APPLICATION OF TRACTION?

A. For best results, apply after mowing or allow sprayed area to completely dry before mowing.

Q. ARE THERE ANY PARTICULAR USE PRECAUTIONS?

A. Yes. To avoid potential for environmental impacts, do not apply this product within 25 ft of permanent water bodies and maintain a 10 ft vegetative buffer strip.

Q. HOW IS TRACTION FORMULATED?

A. Traction is a water-based proprietary suspension concentrate (SC) formulation.

Q. WHAT IS THE SIGNAL WORD?

A. Traction is labeled with a "caution" signal word.

Q. IS TRACTION A RESTRICTED USE PESTICIDE?

A. No.

Q. WHERE IS TRACTION REGISTERED?

A. Traction is currently registered in numerous states including, AL, AR, AZ, CO, DC, DE, FL, GA, HI, IA, ID, IL, IN, KS, KY, LA, MA, MD, MI, MN, MO, MS, MT, NC, NH, NM, NV, NY, OH, OK, OR, PA, RI, SC, TN, TX, UT, VA, VT, WA, WV and WY. More states are being added each month due to standard registration cycles.

Q. WHICH PPE ARE REQUIRED?

A. Long sleeved shirt and long pants, chemical resistant gloves made of any waterproof material and chemical resistant footwear and socks.

Q. WHAT ARE THE STORAGE REQUIREMENTS?

A. Store in original container in a cool, dry place, separate from food and feed. Do not store near heat or open flames.

Q. WHAT ARE THE AVAILABLE CONTAINER SIZES?

A. Traction is available in 2 x 2.5 gal packaging.

Q. IS TRACTION AVAILABLE FROM OTHER MANUFACTURERS?

A. No. Traction is available exclusively from Nufarm and available through select Nufarm distribution.

Q. CAN TRACTION BE USED AROUND POLLINATORS?

A. Yes, when used responsibly and in accordance with label instructions, the active ingredients in Traction are classified as group 3 for pollinator effects.
