

# Arena<sup>®</sup> INSECTICIDE<sup>1</sup>

## Fall Curative Grub Control

Arena<sup>®</sup> Insecticide delivers superior curative control of white grubs. *Arena* does not need to be immediately watered-in, saving you time and labor. And with its superior residual activity, *Arena* brings peace of mind. When other shorter residual insecticides require retreatment, *Arena* lasts – even when grubs move below the treatment zone for weeks before coming back up to damage turf roots.

### Arena is available in two formulations and delivers:

- Controls a broader spectrum of white grubs, including masked chafer and Oriental beetle
- Curative and preventive control of white grubs
- Longest residual grub control regardless of application timing
- Broad-spectrum control of other soil- and surface-feeding insects like nuisance ants, billbugs and chinch bugs
- Available as a 50 WDG and a 0.25 G formulation

White Grubs Controlled	Application Rate	Application Timing
<ul style="list-style-type: none"> <li>• Asiatic Garden Beetle</li> <li>• European chafer</li> <li>• Japanese beetle</li> <li>• Oriental beetle</li> <li>• Masked chafer</li> </ul>	50 WDG: 9.6 - 12.8 oz/A  0.25 G: 120 - 160 lbs/A	<ul style="list-style-type: none"> <li>• Apply when evidence of grub activity is noted - August through October</li> <li>• Best control and turf protection achieved if applied prior to third instar</li> <li>• Use upper end of rate range in post hatch applications</li> <li>• Use of recommended water volumes will ensure consistent control</li> </ul>

### ARENA = SUPERIOR CURATIVE GRUB CONTROL

**Arena Speed Of Activity - Curative Applications**

Treatments applied on September 20 to 3rd instar Northern Masked Chafer  
D. Sheltar, Ohio State University

**Arena Curative White Grub Control**

Treatments applied October 10 to 3rd instar Masked Chafer  
Evaluated October 24  
R. Youngman, Virginia Tech University
