

ROLL OVER CRABGRASS ESCAPES WITH Q-BALL.

Exclusively from Nufarm, new Q-Ball™ herbicide quickly takes out tough crabgrass escapes and more. With a simple one-use rate, studies show Q-Ball quickly eliminates crabgrass escapes in many turfgrass settings. Q-Ball is developed with an innovative water-based formula that delivers maximum stability and tank mixing compatibility. Additionally, Q-Ball is labeled at 10 gallons per acre for low-volume sprayers – that’s half of the rate of competitors’ 20 gallon per acre rates. This summer, count on Q-Ball to manage post-emergent crabgrass.

COMPETITIVE ADVANTAGES

- See real results – fast – more than 90% crabgrass escape control within 7 DAT
- Simple one-use rate of 1.45 oz/1,000 sq ft controls crabgrass escapes and many other weeds
- Minimum of 10 gal/A spray volume for low-volume sprayers
- Stable water-based formulation withstands temperatures from 0° to 129°F
- Excellent tank mixing compatibility with most surfactants and post-emerge herbicides, such as Triplet SF
- Controls more than crabgrass, including clover, dandelion, dollar weed, foxtail, kikuyugrass, signalgrass, speedwell, and torpedo grass

AT-A-GLANCE INFO

EPA REG. NO.	228-744
ACTIVE INGR.	quinclorac (18.92%) (equivalent to 15.98% a.e.)
FORMULATION	water based liquid
CHEM. FAMILY	quinolinecarboxylic acid
HRAC NO.	4
SIGNAL WORD	caution
PACKAGE SIZE	4 x .5 gal squeeze-and-measure, 2 x 2.5 gal
APPLICATION	spray

ROLL OVER CRABGRASS ESCAPES WITH Q-BALL.

KEY USES

Residential and non-residential turfgrasses

KEY WEEDS CONTROLLED

(See product label for complete list)

Barnyardgrass
Clover; hop, red, white
Crabgrass; large, smooth
Daisy, English
Dandelion, common
Dollarweed
Foxtail; giant, green, yellow
Geranium, Carolina
Kikuyugrass
Medic, black
Morningglory
Signalgrass
Speedwell; common, slender, thymeleaf
Torpedograss
Violet, wild

USE SUMMARY

Apply Q-Ball™ herbicide to actively growing weeds as a broadcast or spot spray. Refer to the product label for specific application rates per turf type and weed growth stage.

FOR BROADCAST APPLICATIONS: Apply 4 pts per acre.

FOR SPOT APPLICATIONS: Apply 1.45 fl oz/1,000 sq ft of treated area.

FOR CREEPING BENTGRASS: Apply 2 to 3 split applications at 0.5 to 1.0 fl oz/1,000 sq ft. Do not apply more than 2.9 fl oz/1,000 sq ft per year.

FOR SEEDING/OVERSEEDING/SPRIGGING: The use of this product before or after seeding or over-seeding a turf area will not significantly interfere with the turfgrass seed germination and growth of those grass types identified as tolerant or moderately tolerant.

See product label for complete directions for use.

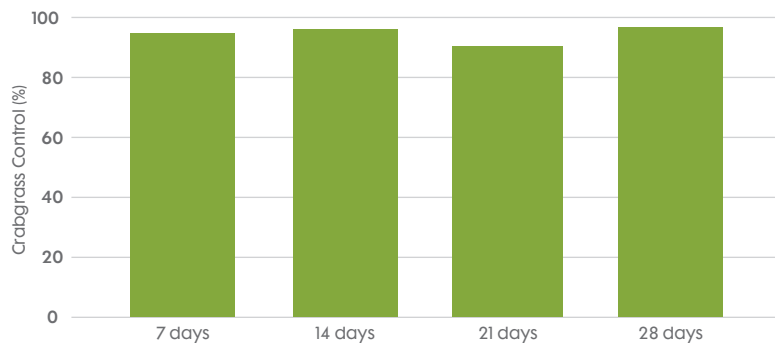

PROVEN PERFORMANCE

Q-Ball is the new standard for crabgrass escapes.

CRABGRASS CONTROL WITH Q-BALL

Jason Fausey, Nufarm, 2018
Treatments applied on August 19
